

EMBARGO: Thursday 21 May 2015 - 11:00 CET

90/2015 - 21 May 2015

## Regional GDP

# GDP per capita in the EU in 2013: seven capital regions among the ten most prosperous

### Announcement

This News Release is the first on regional GDP based on the ESA 2010<sup>1</sup> methodology and data transmission programme. All the methodological changes that were implemented at national level as of September 2014 are applied at the regional level as well. This leads to level shifts that can differ among regions of the same Member State, in particular due to the impact of research and development expenditure.

In addition this release covers two reference years (2012 and 2013) as the ESA2010 data transmission programme requires Member States to transmit the data one year earlier than before. As a result the regional GDP release will be accelerated from now on by one year.

In 2013, regional<sup>2</sup> GDP per capita<sup>3</sup>, expressed in terms of purchasing power standards<sup>4</sup>, ranged from 27% of the EU28 average in the French overseas department of **Mayotte**, to 325% of the average in **Inner London** in the United Kingdom.

This information is taken from data released by **Eurostat, the statistical office of the European Union**.

The bar shows for each Member State the range from the region with the lowest value to that with the highest value.

The leading regions in the ranking of regional GDP per capita in 2013, after **Inner London** in the United Kingdom (325% of the average), were the **Grand Duchy of Luxembourg** (258%), **Bruxelles/Brussel** in Belgium (207%), **Hamburg** in Germany (195%), **Groningen** in the Netherlands (187%), **Bratislava** in Slovakia (184%), **Stockholm** in Sweden (179%), **Île de France** in France (175%) and **Praha** in the Czech Republic (173%).

After **Mayotte** in France (27%), the lowest regions in the ranking were all in Bulgaria and Romania: **Severozapaden** (30%), **Severen tsentralen** (31%) and **Yuzhen tsentralen** (32%) in Bulgaria and **Nord-Est** in Romania (34%).

It should be noted, however, that in some regions the GDP per capita figures can be significantly influenced by commuter flows. Net commuter inflows in these regions push up production to a level that could not be achieved by the resident active population on its own. There is a corresponding effect in regions with commuter outflows.

## Regional GDP per capita in the EU28 in 2013

(in PPS, EU28 = 100)

The twenty highest:			The twenty lowest:

\* Capital region

\*\* 2012 data

1. For more methodological and practical information on the introduction of ESA2010: <http://ec.europa.eu/eurostat/web/esa-2010/overview>. The methodological changes that were implemented with ESA2010, combined with revisions of population data resulting from the population censuses of 2011, have in some countries led to significant statistical changes at the regional level.
2. These data are based on the Nomenclature of Territorial Units for Statistics (NUTS) as modified in January 2011. NUTS 2010 provides a uniform, consistent breakdown of territorial units for the production of regional statistics for the EU. Data for 2013 for 27 of the 28 EU Member States are available at NUTS Level 2. **Germany** has a derogation for 2013 data: at the end of 2015 they will deliver data for both 2013 and 2014. For 2013, data for the 16 German NUTS level 1 regions has been supplied voluntarily. Level 2 of the nomenclature has 273 regions: Belgium (11), Bulgaria (6), the Czech Republic (8), Denmark (5), Germany (38), Ireland (2), Greece (13), Spain (19), France (27), Croatia (2), Italy (21), Hungary (7), the Netherlands (12), Austria (9), Poland (16), Portugal (7), Romania (8), Slovenia (2), Slovakia (4), Finland (5), Sweden (8) and the United Kingdom (37). Estonia, Cyprus, Latvia, Lithuania, Luxembourg and Malta are all considered as single regions at NUTS 2 level. For a list of the European statistical regions see: <http://ec.europa.eu/eurostat/web/nuts/overview>
3. GDP, and thus GDP per capita, provides a measure of the total economic activity in a region. It may be used to compare the degree of economic development of regions. GDP does not measure the income ultimately available to private households in a region. Details of the methodology used can be found in the "Manual on regional accounts methods": <http://ec.europa.eu/eurostat/en/web/products-manuals-and-guidelines/-/KS-GQ-13-001>.
4. The PPS (purchasing power standard) is an artificial currency that takes into account differences in national price levels. This unit allows meaningful volume comparisons of economic indicators over countries. Aggregates expressed in PPS are derived by dividing aggregates in current prices and national currency by the respective Purchasing Power Parity (PPP).

<i>Extra-regio*</i>	<b>8 517</b>		<b>6 294</b>			<b>6 361</b>		<b>4 668</b>		

\* **Extra-regio:** The extra-regio territory is made up of parts of the economic territory of a country which cannot be assigned to a single region. It consists of the national air-space, territorial waters and the continental shelf lying in international waters over which the country enjoys exclusive rights, territorial exclaves, deposits of oil, natural gas etc. worked by resident units.

Until 2011, the gross value added (GVA) produced in the extra-regio was allocated pro-rata to the inhabited regions of the country concerned. The order of magnitude of the extra-regio GVA depends in particular on the resource endowment in terms of natural gas and oil. For EU Member States the share of extra-regio GVA varies typically from almost zero to about 2.5% of total GVA at national level. In 2011, Member States and the European Commission agreed to give countries the possibility to calculate regional GDP also for the extra-regio. The resulting GDP is available only in absolute values, because the extra-regio territory by definition does not have a resident population.

Member States are entitled, but not obliged to calculate GDP for the extra-regio. In the table extra-regio GDP appears only for those Member States which decided to make use of this possibility.
