

PRODUCTION AND DELIVERIES OF ENERGY PRODUCTS, DECEMBER 2014^{1,2}

Production of energy products

In December 2014 compared to November 2014 an increase is reported for the production of:

- solid fuels - by 8.8% to 3 413 thousand tonnes;
- unleaded motor gasoline - by 4.8% to 153 thousand tonnes;
- natural gas - by 140.0% to 12 million m³;
- electricity - by 11.3% to 4 893 GWh.

A decrease is reported for the production of:

- transport diesel - by 2.2% to 180 thousand tonnes.

No change for the production of liquefied petroleum gases is reported (Annex, Table 1).

In December 2014 compared to December 2013 an increase is reported for the production of:

- liquefied petroleum gases - by 42.9%;
- unleaded motor gasoline - by 17.7%;
- transport diesel - by 36.4%;
- electricity - by 4.4%.

A decrease is reported for the production of:

- solid fuels - by 11.1%;
- natural gas - by 50.0%.

Deliveries of energy products

In December 2014 compared to November 2014 an increase is reported for the deliveries of:

- solid fuels - by 11.1% to 3 643 thousand tonnes;
- unleaded motor gasoline - by 60.9% to 37 thousand tonnes;
- transport diesel - by 29.8% to 157 thousand tonnes;
- natural gas - by 19.0% to 344 million m³;
- electricity - by 11.4% to 3 346 GWh.

No change for the deliveries of liquefied petroleum gases is reported (Annex, Table 2).

¹ The survey on energy products is conducted every month in accordance with the Regulation (EO) № 1099/2008 of the European Parliament and of the Council of 22 November 2008 on energy statistics, amended by the Commission Regulation (EU) No 147/2013 of 13 February 2013 of the European Parliament and of the Council as regards the implementation of updates for the monthly and annual energy statistics. The survey aims to submit information on the production and inland deliveries of the main energy products - electricity, solid fuels, natural gas and petroleum products. The reporting units are producers, importers and exporters of energy products. Production and deliveries of the energy products are the main observed indicators.

² Data series can be found on the NSI website: www.nsi.bg, section Energy/Data.

In December 2014 compared to December 2013 an increase is reported for the deliveries of:

- unleaded motor gasoline - by 37.0%;
- transport diesel - by 9.8%.

A decrease is reported for the deliveries of:

- solid fuels - by 10.3%;
- liquefied petroleum gases - by 2.9%;
- natural gas - by 3.1%;
- electricity - by 4.5%.

Methodological notes

Solid fuels

Production - includes Hard coal, Lignite and Solid fuels from coal. Producers report quantities calculated after any operation for removal of inert matter.

Deliveries - quantities delivered to the internal market. They are equal to the total of the deliveries to the different types of consumers: producers' own use, main activity power stations, coking plants and patent fuel plants, industry, iron and steel industry and others.

Petroleum products

Production - includes production of finished products at a refinery or blending plant.

Deliveries - wholesale deliveries to the domestic market of finished petroleum products from producers, importers/exporters.

Deliveries of petroleum products are defined as: primary product receipts + gross refinery output + recycled products - refinery fuel + imports - exports - international marine bunkers + interproduct transfers - products transferred - stock changes.

Natural gas

Production - includes all dry marketable production within national boundaries including offshore production. Production is measured after purification and extraction of NGLs and sulphur.

Deliveries - total natural gas, distributed for the internal market, including own use and losses. This is defined as: *Indigenous production + Imports - Exports - Stock change*.

Data are presented in million cubic metres assuming reference gas conditions 15° C and 101.325 kPa.

Electricity

Production - includes produced electricity from Thermal power plants, Nuclear power plant, Hydro power plants, Pumped storage plant and electricity, obtained from wind generators and solar panels.

Deliveries - sum of net produced electricity and net import.
