

INFLATION AND CONSUMER PRICE INDICES IN MAY 2014

Consumer price index (CPI)

The **consumer price index** in May 2014 compared to April 2014 was 99.5%, i.e. the monthly inflation was -0.5%. The inflation rate since the beginning of the year (May 2014 compared to December 2013) has been -1.0% and the annual inflation in May 2014 compared to May 2013 was -2.0% (Figure 1 and Annex, Table 1).

The annual average inflation, measured by CPI, in the last 12 months (June 2013 - May 2014) compared to the previous 12 months (June 2012 - May 2013) was -1.2%.

Figure 1. Inflation measured by CPI by months

In May 2014 compared to the previous month the prices of goods and services in the main consumer groups have changed as follows:

- Food and non-alcoholic beverages - a decrease of 1.0%;
- Alcoholic beverages and tobacco - the prices remained at the level of the previous month;
- Clothing and footwear - an increase of 0.1%;
- Housing (rentals, maintenance and repair), water, electricity, gas and other fuels - the prices remained at the level of the previous month;
- Furnishings, household equipment and routine maintenance of the house - a decrease of 0.1%;
- Health - an increase of 0.1%;

- Transport - a decrease of 0.7%;
- Communications - a decrease of 1.9%;
- Recreation and culture - a decrease of 0.7%;
- Education - a decrease of 0.1%;
- Restaurants and hotels - a decrease of 0.2%;
- Miscellaneous goods and service - an increase of 0.4%.

Harmonized index of consumer prices (HICP)

The **harmonized index of consumer prices** in May 2014 compared to April 2014 was 99.5%, i.e. the monthly inflation was -0.5%. The inflation rate since the beginning of the year (May 2014 compared to December 2013) has been -1.4% and the annual inflation in May 2014 compared to May 2013 was -1.8% (Annex, Table 2).

The annual average inflation, measured by HICP, in the last 12 months (June 2013 - May 2014) compared to the previous 12 months (June 2012 - May 2013) was -1.0%.

In terms of HICP, in May 2014 compared to the previous month the prices of goods and services in the main consumer groups have changed as follows:

- Food and non-alcoholic beverages - a decrease of 1.0%;
- Alcoholic beverages and tobacco - the prices remained at the level of the previous month;
- Clothing and footwear - an increase of 0.1%
- Housing (rentals, maintenance and repair), water, electricity, gas and other fuels - the prices remained at the level of the previous month;
- Furnishings, household equipment and routine maintenance of the house - the prices remained at the level of the previous month;
- Health - the prices remained at the level of the previous month;
- Transport - a decrease of 0.6%;
- Communications - a decrease of 1.7%;
- Recreation and culture - a decrease of 0.2%;
- Education - a decrease of 0.1%;
- Restaurants and hotels - a decrease of 0.9%;
- Miscellaneous goods and service - an increase of 0.2%.

Price index of a small basket (PISB)

The **price index of a small basket** in May 2014 compared to April 2014 was 99.4% and the overall decrease since the beginning of the year (May 2014 compared to December 2013) has been 99.6% (Annex, Table 3).

In May compared to the previous month the prices of goods and services in the small basket for the 20% households with the lowest income have changed as follows:

- Food products - a decrease of 1.3%;
- Non-food products - an increase of 0.3%;
- Services - the prices remained at the level of the previous month.

Methodological notes

The **consumer price index (CPI)** is the official measure of inflation in the Republic of Bulgaria. It measures the total relative price change of goods and services used by households for private (non-production) consumption and is calculated by applying the structure of the final monetary consumption expenditures of Bulgarian households. The main source of information for the expenditures is the household budget survey in the country. CPI in year t is calculated with the expenditures structure of year $t-1$.

The **Harmonized Index of Consumer Prices (HICP)** is the comparable measure of inflation across EU Member states. It is one of the criteria of price stability and readiness of Bulgaria to join the euro-zone. HICP, as well as CPI, measure the total relative price change of goods and services. Both indices are calculated using the same basket of goods and services, but differ with respect to the weights used. HICP is calculated through the use of weights, which reflect the individual and the collective consumption of all households (incl. institutional and foreign households) on the economic territory of the country. The main source of information for HICP weights is the national accounts data. HICP in year t is calculated with the weights of year $t-2$.

The **Price Index of a Small Basket (PISB)** is a measurement of the relative average price changes of 100 socially useful and vital for living goods and services. The weights of this index reflect the expenditures of the 20% lowest household's incomes. The source of weights information is the Households Budget Survey in the country. This index in year t is calculated with the weights of year $t-1$.

The **chain** consumer price indices measure the price change in the current month compared to the previous month. The chain consumer price indices are used as a measure of **monthly inflation**.

The **12-month** consumer price indices measure the price changes occurring between the current month and the same month of the previous year. The 12-months consumer price indices are used as a measure of **annual inflation**.

Consumer price indices **over December of the previous year** measure the accumulated changes in prices of the current month with respect to December of the previous year. Consumer price indices over December of the previous year are used as measures of the **inflation since the beginning of the year**. In December of each year, the 12-months index is equal to the index over December of the previous year.

The **annual average** consumer price indices measure the average price change during the 12 months of the current year compared to the average price change during the 12 months of the previous year. The annual average consumer price indices are used as a measure of the **annual average inflation**.

Annex

Table 1

Consumer price indices in May 2014

(Per cent)

Commodity groups	2013 weights	May 2014		
		Previous month = 100	December 2013 = 100	Corresponding month of the previous year = 100
00 Total CPI	100.000	99.5	99.0	98.0
