Industrial Production Indices in July 2011¹

The preliminary data showed that the Industrial Production Index², seasonally adjusted³, increased by 1.5% in July 2011 as compared to June 2011.

In July 2011 working day adjusted⁴ Industrial Production Index rose by 6.2% as compared to the same month of 2010.

Figure 1. Industrial Production Indices (2005=100)

¹July 2011 data are preliminary.

The seasonally and working day adjusted data on Industrial production index for the period 2000-2010 can be found in NSI internet web-site: (http://www.nsi.bg/otrasalen.php?otr=46).

² Monthly Industrial Production and Industrial turnover indices measure changes in **production and turnover values** of industrial enterprises. This information can be used to access the current economic development and for short-term forecasts. Indices do not measure the actual production level, it aims to measure the average change in value of production between two points of time

Indices are compiled on the base of information collected through representative sampling survey on industrial enterprises. The sample covers enterprises with annual turnover more than 97% of total turnover in industry.

Industrial production indices are calculated at constant base year (2005) that is to say they are weighted with the structure of the value added at factor costs in the base year.

³ Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series and it is particularly suitable for long-term comparisons and analysis of the data.

⁴ **Working day adjustment** is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holydays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

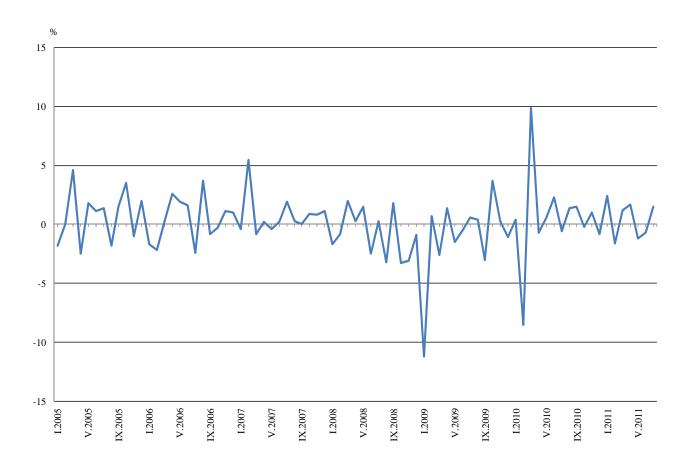

www.esi.bg

Monthly comparisons

In July 2011 as compared to June 2011, the seasonally adjusted Industrial Production Index in the mining and quarrying industry increased by 11.3%, in the electricity, gas, steam and air conditioning supply by 9.1%, while in the manufacturing a decrease by 0.6% was seen.

The most significant decreases of production in the manufacturing were seen in the manufacture of textiles by 16.6%, in the repair and installation of machinery and equipment by 12.3%, in the manufacture of tobacco products by 8.3%, in the manufacture of paper and paper products by 4.6%. There was increase in the manufacture of beverages by 5.2%, in the manufacture of basic metals by 5.0%, in the manufacture of food products and in the manufacture of fabricated metal products, except machinery and equipment by 3.6%.

Figure 2. Percentage changes of Industrial Production Indices compared to the previous month (seasonaly adjusted)

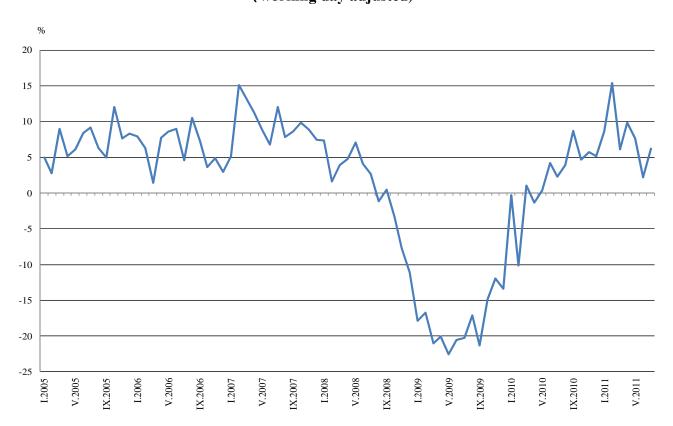

reverse, resident

Annual comparisons

On annual bases in July 2011 Industrial Production Index, calculated from working day adjusted data in the mining and quarrying industry grew by 10.3%, in the electricity, gas, steam and air conditioning supply by 7.4% and in the manufacturing by 5.9%.

Increases were registered in the production of intermediate goods by 9.6%, in the production of investment goods by 5.6% and in the production of energy by 4.7%.

Figure 3. Percentage changes of Industrial Production Indices compared to the same month of the previous year (working day adjusted)

The final data on Industrial Production and Turnover Indices for June 2011 can be found in NSI internet web-site: (http://www.nsi.bg/otrasalen.php?otr=46).
