¹ Preliminary data.

The total turnover index in section “Information and communication” increased by 1.6% in comparison with the first quarter of 2013. The most significant increase was seen in Motion picture, video and TV programme production, music publishing activities and Information service activities – by 15.3% and 12.4%, respectively.

Figure 2. Change of turnover indices in „Information and communication” compared to the previous quarter (Seasonally adjusted)

In “Other business services” the highest increase in comparison with the previous quarter was registered in Employment activities – by 13.5% and Office administrative, office support and other business support activities – by 13.0%.

Drop of index by 17.8% was observed in Cleaning activities.

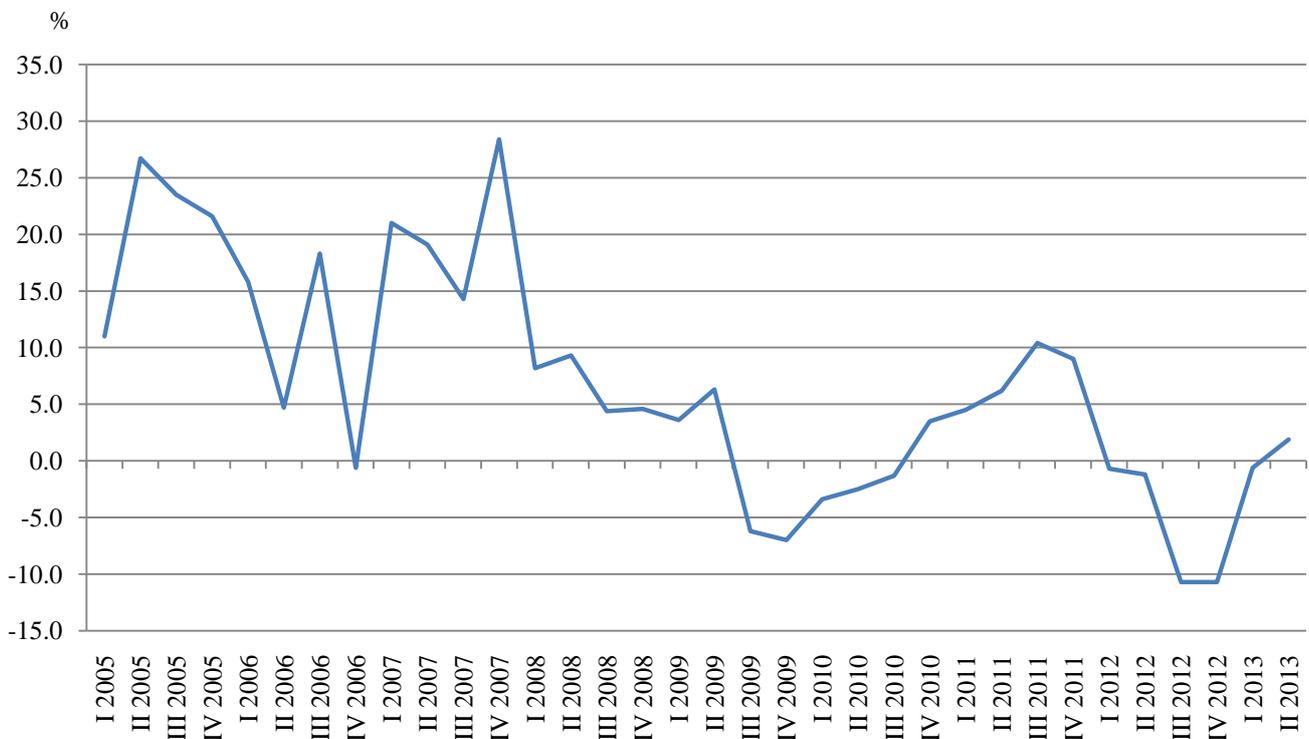

Annual changes

During the second quarter of 2013 the total working day adjusted turnover index in section „Transportation, storage and post” increased by 7.5% compared to the same quarter of 2012. This increase was mainly due to growth in Land transport (by 11.8%), while in Water transport was recorded a decrease by 23.5%.

The total working day adjusted turnover index in section „Information and communication” rose by 1.9% compared to the second quarter of 2012. The essential increase was registered in Motion picture, video and TV programme production, music publishing activities – by 36.9% and Information service activities – by 19.5%. Decrease of index was reported in Publishing activities and Telecommunications – by 2.7% and 2.3%, respectively.

(Working day adjusted)**

In „Other business services” the biggest growth in comparison with the same quarter of 2012 was observed in Office administrative, office support and other business support activities – by 38.4% and in Employment activities – by 23.8%. Drop of index was registered in Cleaning activities – by 22.3%.

Methodological notes

Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series and it is particularly suitable for long-term comparisons and analysis of the data.

Working day adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holydays and outliers.

More methodological information on the quarterly survey and data for the period 2000 – 2013 could be found on NSI official web-site.
