<sup>1</sup>Producer Price Indices measure the average change in the prices of industrial products, which are produced and sold by Bulgarian enterprises. They can be considered as an early measure of the current inflation process in the economy and also they can be used for international comparisons. Information for calculation of Producer Price Indices is received on the bases of monthly surveys on producer prices of industrial products, sold on domestic market and on industrial products sold on non-domestic market. Producer price surveys are based on constant sample of groups of products, and that sample is representative for total industrial production.

<sup>2</sup> Producer Price Indices on domestic market are calculated at constant base (2010) weighed with turnover structure on domestic market.

## 2. Total Producer Price Indices in Industry<sup>1</sup>

**Total Producer Price Index in Industry** in May 2015 increased by 0.7% compared to the previous month. Higher prices were registered in the manufacturing by 1.4%, while the prices fell in the mining and quarrying industry by 3.0%, and in the electricity, gas, steam and air conditioning supply by 0.7%.

In the manufacturing<sup>2</sup>, more significant prices increases were seen in the manufacture of basic metals by 2.4% and in the manufacture of wearing apparel by 0.8%, while prices decreases were reported in the manufacture of chemicals and chemical products by 1.1%, in the manufacture of other transport equipment

<sup>1</sup> Total Producer Price Index is calculated from Producer Price Index on Domestic Market and Producer Price Index on Non-domestic Market weighted with the turnover structure on domestic and on non-domestic market to the total value of turnover in the base year.

**Total Producer Price Index** in May 2015 increased by 0.3% compared to the same month of 2014.

In the manufacturing, the prices fell by 0.7% compared to May 2014. More significant prices decreases were seen in the manufacture of other non-metallic mineral products by 1.2% and in the manufacture of food products by 0.9%, while the producer prices went up in the manufacture of basic metals by 11.7%, in the manufacture of other transport equipment by 8.3%, and in the manufacture of textiles by 5.9%.
