### Scope and Basic Terminology

**External trade in goods** covers trade with third countries (Extrastat) and with EU member states (Intrastat), with detailed statistical information collected at the commodity code level (8 digits) of the Combined Nomenclature.

**Imports** include all goods entering the statistical territory\* of the Republic of Bulgaria from other countries intended for domestic consumption, processing in the country for export after processing, as well as imports of goods processed outside the country.

**Exports** include all goods leaving the statistical territory of the Republic of Bulgaria intended for normal export to another country. This includes goods returned to the trading partner after processing in Bulgaria or goods exported for processing in another country with the intention of being returned to Bulgaria.

The **statistical territory of the European Union (EU)**, in the context of international trade in goods statistics, corresponds to the combined customs territories of the EU member states with one exception: unlike the customs territory, the statistical territory of Germany includes Helgoland.
