

***Since July 2024, NSI has started publishing Turnover Indices in Retail trade by base year 2021 = 100 in accordance with the requirements of Regulation (EU) 2019/2152 of the European Parliament and of the Council for European Business Statistics and Commission Implementing Regulation (EU) 2020/1197.***

**TURNOVER INDICES IN 'RETAIL TRADE, EXCEPT MOTOR VEHICLES AND MOTORCYCLES', OCTOBER 2024**

In October<sup>1</sup> 2024, the turnover in 'Retail trade, except motor vehicles and motorcycles' at constant prices increased by 0.8% compared to the previous month. The data are preliminary and seasonally adjusted.

The trade turnover rose by 5.1% compared to the same month of 2023 according to the calendar-adjusted data.

**Figure 1. Turnover Indices in 'Retail trade, except motor vehicles and motorcycles'  
(2021 = 100)**

<sup>1</sup> Data for October 2024 are preliminary.

## TURNOVER INDICES IN 'RETAIL TRADE, EXCEPT MOTOR VEHICLES AND MOTORCYCLES', OCTOBER 2024

### Monthly changes

In October 2024, growth was reported in all big groups: 'Retail sales of automotive fuel in specialised stores' - by 3.0%, 'Retail sales of food, beverages and tobacco' - by 1.1% and 'Retail sales of non-food products (except fuel)' - by 0.6%.

In the group 'Retail sales of non-food products (except fuel)' a major increase was observed in 'Retail sale via mail order houses or via Internet' - by 4.5%. A decrease was registered in 'Retail sales of textiles, clothing, and footwear and leather goods' - by 1.3% and in 'Dispensing chemist; retail sale of medical and orthopaedic goods, cosmetic and toilet articles' - by 0.7%.

---

### **Methodological notes**

The monthly turnover indices reflect the short-term changes in the value of this indicator between two compared periods at constant prices. The information may be used to assess the current situation and the trends in the development of the trade sector as well as for short-term forecasts. In order to calculate the indices, trade enterprises are observed by using a representative sample that forms about 70% of the annual receipts of the observed aggregate. The monthly turnover indices are calculated according to Regulation (EU) 2019/2152 of the European Parliament and of the Council on European Business Statistics repealing 10 legal acts with 2021 as a base year.

Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series.

Calendar adjustment is an adjustment for variations caused by calendar effects, a different number of calendar and working days in the months, national holidays and outliers (for example, the presence of more non-working days in May could contribute to the decline in the retail trade).

Since July 2024, all dynamic rows have been recalculated based on the 2021 base year and have been published in the IS Infostat.
