

INFLATION AND CONSUMER PRICE INDICES IN NOVEMBER 2024

The monthly inflation rate was 0.6%, while the annual inflation rate was 2.1%. The inflation rate is measured by the CPI, with monthly inflation referring to the month of November 2024 compared to the previous month, and annual inflation for November 2024 compared to the same month of the previous year.

In November 2024, compared to the previous month, the highest increase was registered in the following groups: 'Food and non-alcoholic beverages' (+1.4%), 'Recreation and culture' (+1.3%), 'Alcoholic beverages and tobacco' (+0.7%) and 'Transport' (+0.7%). The highest decrease in the prices was recorded in the groups: 'Clothing and footwear' (-1.3%) and 'Furnishings, household equipment and routine maintenance of the house' (-0.4%).

Consumer Price Index (CPI)

In November 2024, the **monthly inflation** rate was 0.6% and the **annual inflation** rate in November 2024 compared to November 2023 was 2.1%¹.

The inflation rate since the beginning of the year (November 2024 compared to December 2023) was 1.8%, and the annual average inflation rate for the period December 2023 - November 2024 compared to the period December 2022 - November 2023 was 2.6%.

¹ According to the CPI methodology. For more information, see the Methodological notes on pages 5 and 6 and Annex, Table 1.

INFLATION AND CONSUMER PRICE INDICES IN NOVEMBER 2024

Figure 1. Inflation, measured by CPI, by month

Monthly inflation

In November 2024, the prices of goods and services increased in the following consumer groups:

- 'Food and non-alcoholic beverages' - an increase of 1.4%;
- 'Recreation and culture' - an increase of 1.3%;
- 'Alcoholic beverages and tobacco' - an increase of 0.7%;
- 'Transport' - an increase of 0.7%;
- 'Restaurants and hotels' - an increase of 0.6%;
- 'Communications' - an increase of 0.4%;
- 'Education' - an increase of 0.3%;
- 'Health' - an increase of 0.2%.

The prices of goods and services decreased in the following consumer group:

- 'Clothing and footwear' - a decrease of 1.3%;
- 'Furnishings, household equipment and routine maintenance of the house' - a decrease of 0.4%;
- 'Housing, water, electricity, gas and other fuels' - a decrease of 0.2%;

INFLATION AND CONSUMER PRICE INDICES IN NOVEMBER 2024

- 'Miscellaneous goods and services' - a decrease of 0.2%.

Harmonized Index of Consumer Prices (HICP)

In November 2024, the **monthly inflation** rate, measured by HICP, was 0.3% and the **annual inflation** rate in November 2024 compared to November 2023 was 2.0%¹.

The inflation rate since the beginning of the year (November 2024 compared to December 2023) was 1.7%, and the annual average inflation rate for the period December 2023 - November 2024 compared to the period December 2022 - November 2023 was 2.8%.

Figure 2. Inflation, measured by HICP, by month

Monthly inflation

In terms of HICP, in November 2024, the prices of goods and services increased in the following consumer groups:

- 'Food and non-alcoholic beverages' - an increase of 1.1%;
- 'Alcoholic beverages and tobacco' - an increase of 0.7%;
- 'Communications' - an increase of 0.4%;

¹ According to the HICP methodology. For more information, see the Methodological notes on pages 5 and 6 and Annex, Table 2.

INFLATION AND CONSUMER PRICE INDICES IN NOVEMBER 2024

- 'Restaurants and hotels' - an increase of 0.4%;
- 'Education' - an increase of 0.3%;
- 'Health' - an increase of 0.2%;
- 'Transport' - an increase of 0.1%;
- 'Recreation and culture' - an increase of 0.1%.

The prices of goods and services decreased in the following consumer groups:

- 'Clothing and footwear' - a decrease of 1.3%;
- 'Furnishings, household equipment and routine maintenance of the house' - a decrease of 0.3%;
- 'Housing, water, electricity, gas and other fuels' - a decrease of 0.2%;

The prices of goods and services in 'Miscellaneous goods and services' remained unchanged.

Price Index of a Small Basket (PISB)

In November 2024, a price increase of 0.9%, measured by the **Price Index of a Small Basket**, was registered on a monthly basis, and a price increase of 2.2% - since the beginning of the year¹.

In November 2024, compared to the previous month, the prices of goods and services in the small basket for the 20% of households with the lowest income changed as follows:

- 'Food products' - an increase of 2.1%;
- 'Non-food products' - a decrease of 0.4%;
- 'Services' - a decrease of 0.1%.

¹ For more information, see the Methodological notes on pages 5 and 6 and Annex, Table 3.

INFLATION AND CONSUMER PRICE INDICES IN NOVEMBER 2024

Methodological notes

The **Consumer Price Index (CPI)** is the official measure of inflation in the Republic of Bulgaria. It measures the total relative price change of goods and services used by households for private (non-production) consumption. It is calculated by applying the structure of Bulgarian households' final monetary consumption expenditures. The main source of information for the expenditures is the household budget survey in the country. The CPI in year t is calculated with the expenditures' structure of year $t - 1$.

The **Harmonized Index of Consumer Prices (HICP)** is the comparable measure of inflation across EU Member States. It is one of the criteria for price stability and the readiness of Bulgaria to join the Eurozone. HICP, as well as CPI, measures the total relative price change of goods and services. Both indices are calculated using the same basket of goods and services but differ with concern to the weights used. HICP is calculated using weights, which reflect the individual and collective consumption of all households (incl. institutional and foreign households) in the country's economic territory. The main source of information for HICP weights is the national accounts (NA) data. For calculating the HICP in 2024, NA data for households' final monetary consumption expenditures (HFMCE) - domestic concept in 2022 is used. NA 2022 data are reviewed and updated to make them representative of 2023, following Eurostat's methodological guidance on the compilation of HICP weights in case of large changes in consumer expenditures¹.

In compliance with Regulation (EC) No. 2015/2010, **since January 2016, the base year for the HICP has changed**, and all indices have been calculated and published using **2015 as a base year**. The time series have been recalculated according to the new base year and have been posted on the NSI website (www.nsi.bg).

The **Price Index of a Small Basket (PISB)** measures the relative average price changes of 100 socially useful and vital living goods and services. The weights of this index reflect the expenditures of the 20% lowest households' incomes. The source of the information on weights is the Households Budget Survey in the country. This index in year t is calculated with the weights of year $t - 1$.

¹ Guidance on the compilation of HICP weights in case of large changes in consumer expenditures, Eurostat, Directorate C, Macro-economic statistics, 3.02.2020: <https://ec.europa.eu/eurostat/documents/10186/10693286/Guidance-on-the-compilation-of-HICP-weights-in-case-of-large-changes-in-consumer-expenditures.pdf>.

INFLATION AND CONSUMER PRICE INDICES IN NOVEMBER 2024

The **chain** consumer price indices measure the price change in the current month compared to the previous month. The chain consumer price indices are used as a measure of **monthly inflation**.

The **12-month** consumer price indices measure the price changes occurring between the current month and the same month of the previous year. The 12-month consumer price indices are used as a measure of **annual inflation**.

Consumer price indices **over December of the previous year** measure the accumulated changes in prices of the current month concerning December of the previous year. Consumer price indices over December of the previous year are used as measures of **inflation since the beginning of the year**. In December of each year, the 12-month index is equal to the index over December of the previous year.

The **annual average** consumer price indices measure the average price change during the 12 months of the current year compared to the average price change during the 12 months of the previous year. The annual average consumer price indices are used as a measure of the **annual average inflation**.
