

# PRODUCTION AND DELIVERIES OF ENERGY PRODUCTS, NOVEMBER 2024

In November 2024, compared to October 2024, in the production of energy products, the largest increase is observed in solid fuels - by 73.5%. The largest decrease is registered in motor gasoline - by 29.3%.

In the deliveries of energy products the largest increase is observed in solid fuels - by 60.5%. The largest decrease is registered in liquefied petroleum gases - by 10.3%.

## Production of energy products

In November 2024, compared to October 2024, an increase was reported in the production of:

- solid fuels by 73.5% to 2 042 thousand tonnes;
- electricity by 3.5% to 3 008 GWh.

A decrease is reported in the production of:

- motor gasoline by 29.3% to 87 thousand tonnes;
- liquefied petroleum gases by 14.3% to 6 thousand tonnes;
- transport diesel by 1.6% to 250 thousand tonnes.

There is no change in the production of natural gas (Annex, Table 1).

Compared to the same month of 2023, an increase is reported in the production of:

- liquefied petroleum gases by 50.0%;
- solid fuels by 16.4%.
- A decrease is reported in the production of:
- motor gasoline by 42.4%;
- transport diesel by 3.8%;
- electricity by 3.3%.

There is no change in the production of natural gas.

### **Deliveries of energy products**

In November 2024, compared to October 2024, an increase was reported in the deliveries of:

- solid fuels by 60.5% to 2 095 thousand tonnes;
- natural gas by 32.4% to 290 million m<sup>3</sup>;
- electricity by 24.8% to 3 254 GWh;

## PRODUCTION AND DELIVERIES OF ENERGY PRODUCTS, NOVEMBER 2024

- motor gasoline by 12.5% to 63 thousand tonnes.
- A decrease is reported in the deliveries of:
- liquefied petroleum gases by 10.3% to 35 thousand tonnes;
- transport diesel by 2.4% to 242 thousand tonnes (Annex, Table 2).

Compared to the same month of 2023, an increase is reported in the deliveries of:

- motor gasoline by 28.6%;
- electricity by 13.2%;
- natural gas by 11.5%;
- solid fuels by 8.8%;
- transport diesel by 1.7%.

There is no change in the deliveries of liquefied petroleum gases.

#### **Methodological notes**

The survey on energy products is conducted every month in accordance with Regulation (EU) No. 1099/2008 of the European Parliament and of the Council of 22 October 2008 on energy statistics and its amendments. The survey aims to submit information on the production and inland deliveries of the main energy products - electricity, solid fuels, natural gas and petroleum products. The reporting units are producers, importers and exporters of energy products. Production and deliveries of energy products are the main observed indicators.

Data series can be found on NSI's website: <u>www.nsi.bg</u>, section Energy/Data.

#### Solid fuels

*Production* - includes hard coal, lignite and solid fuels from coal. Producers report quantities calculated after any operation for the removal of inert matter.

*Deliveries* - it is calculated as: production + imports – exports + stock change.

Since 1.01.2017, Brown coal briquettes have been excluded from the monthly survey.

#### **Petroleum products**

*Production* - includes production of finished products at a refinery or blending plant.

*Deliveries* - wholesale deliveries to the domestic market of finished petroleum products from producers and importers/exporters.

## PRODUCTION AND DELIVERIES OF ENERGY PRODUCTS, NOVEMBER 2024

Deliveries of petroleum products are defined as: primary product receipts + gross refinery output + recycled products - refinery fuel + imports - exports - international marine bunkers + interproduct transfers - products transferred - stock changes.

The production and deliveries of motor gasoline and transport diesel include the quantity of biofuel, mixed with the mineral fuel.

#### Natural gas

*Production* - includes all dry marketable production within national boundaries, including offshore production. Production is measured after purification and extraction of NGLs and sulphur. Excludes extraction losses and quantities reinjected, vented or flared. Includes quantities used within the natural gas industry; in gas extraction, pipeline systems and processing plants.

*Deliveries* - total natural gas, distributed for the internal market, including own use and losses.

Data are presented in million cubic meters assuming reference gas conditions 15°C and 101.325 kPa. To convert quantities from cubic meters at 20°C to cubic meters at 15°C - according to the reporting requirements of Regulation (EU) No. 1099/2008 of the European Parliament and the Council on Energy Statistics, we use a conversion factor of 0.98294.

### Electricity

*Production* - includes produced electricity from thermal power plants, nuclear power plants, hydropower plants, pumped storage plants and electricity, obtained from wind generators and solar panels.

*Deliveries/Total net consumption* - the sum of the net produced electricity and net import, reduced by the amount used for pumped storage.

#### **PRODUCTION AND DELIVERIES OF ENERGY PRODUCTS**,
