

PRODUCTION AND DELIVERIES OF ENERGY PRODUCTS - JUNE 2025

In June 2025, compared to May 2025, in the production of energy products was observed an increase, as the largest was registered in motor gasoline - by 35.4%.

For the deliveries of energy products, an increase was observed only in solid fuels - by 37.3%. The largest decrease was registered in motor gasoline - by 69.3%.

Production of energy products

In June 2025, compared to May 2025, an increase was reported in the production of:

- motor gasoline by 35.4% to 134 thousand tonnes;
- transport diesel by 34.8% to 267 thousand tonnes;
- solid fuels by 31.7% to 880 thousand tonnes;
- electricity by 17.0% to 3 024 GWh.

No change in the production of liquefied petroleum gases and natural gas (Table 1).

Compared to the same month of 2024, an increase was reported in the production of:

- solid fuels by 58.6%;
- electricity by 22.8%.

A decrease was reported in the production of:

- liquefied petroleum gases by 25.0%;
- transport diesel by 10.7%;
- motor gasoline by 6.3%.

No change in the production of natural gas.

Deliveries of energy products

In June 2025, compared to May 2025, an increase was reported in the deliveries of solid fuels - by 37.3% to 960 thousand tonnes.

A decrease was reported in the deliveries of:

- motor gasoline by 69.3% to 23 thousand tonnes;
- natural gas by 17.8% to 148 million m³;
- liquefied petroleum gases by 7.5% to 37 thousand tonnes;
- transport diesel by 7.4% to 238 thousand tonnes;
- electricity by 0.2% to 2 403 GWh (Table 1).

Compared to the same month of 2024, an increase was reported in the deliveries of:

- solid fuels by 61.6%;
- transport diesel by 16.7%.

A decrease was reported in the deliveries of:

- motor gasoline by 60.3%;
- natural gas by 19.1%;
- liquefied petroleum gases by 5.1%;
- electricity by 3.6%.

Methodological notes

The survey on energy products is conducted every month in accordance with Regulation (EU) No. 1099/2008 of the European Parliament and of the Council of 22 October 2008 on energy statistics and its amendments. The survey aims to submit information on the production and inland deliveries of the main energy products - electricity, solid fuels, natural gas and petroleum products. The reporting units are producers, importers and exporters of energy products. Production and deliveries of energy products are the main observed indicators.

Data series can be found on NSI's website: www.nsi.bg, section Energy/Data.

Solid fuels

Production - includes hard coal, lignite and solid fuels from coal. Producers report quantities calculated after any operation for the removal of inert matter.

Deliveries - it is calculated as: production + imports - exports + stock change.

Since 1.01.2017, Brown coal briquettes have been excluded from the monthly survey.

Petroleum products

Production - includes production of finished products at a refinery or blending plant.

Deliveries - wholesale deliveries to the domestic market of finished petroleum products from producers and importers/exporters.

Deliveries of petroleum products are defined as: primary product receipts + gross refinery output + recycled products - refinery fuel + imports - exports - international marine bunkers + interproduct transfers - products transferred - stock changes.

The production and deliveries of motor gasoline and transport diesel include the quantity of biofuel, mixed with the mineral fuel.

Natural gas

Production - includes all dry marketable production within national boundaries, including offshore production. Production is measured after purification and extraction of NGLs and sulphur. Excludes extraction losses and quantities reinjected, vented or flared. Includes quantities used within the natural gas industry; in gas extraction, pipeline systems and processing plants.

Deliveries - total natural gas, distributed for the internal market, including own use and losses.

Data are presented in million cubic meters assuming reference gas conditions 15° C and 101.325 kPa. To convert quantities from cubic meters at 20° C to cubic meters at 15° C - according to the reporting requirements of Regulation (EU) No. 1099/2008 of the European Parliament and the Council on Energy Statistics, we use a conversion factor of 0.98294.

Electricity

Production - includes produced electricity from thermal power plants, nuclear power plants, hydropower plants, pumped storage plants and electricity, obtained from wind generators and solar panels.

Deliveries|Total net consumption - the sum of the net produced electricity and net import, reduced by the amount used for pumped storage.
