- 'Services' - an increase of 0.1%.

The press release for inflation and consumer price indices for June 2026 will be published on 15 July 2026.

Methodological notes

Flash estimates for inflation and consumer price indices are calculated based on registered prices which accounts for about 90% of all planned registrations for the reference month. The remaining received data are included into the calculation of the indices of consumer prices of the final data.

Flash estimates and final data for inflation and consumer price indices are published on NSI's website, according to the [Release calendar](#).

The **chain** consumer price indices measure the price change in the current month compared to the previous month. The chain consumer price indices are used as a measure of **monthly inflation**.

The **12-month** consumer price indices measure the price changes occurring between the current month and the same month of the previous year. The 12-month consumer price indices are used as a measure of **annual inflation**.
