

PRODUCER PRICES IN FORESTRY - SECOND QUARTER OF 2026

The Producer Price Index in Forestry increased by 1.7% in the second quarter of 2026 compared to the previous year (on an annual basis).

The change is a result of the increase in the prices of wood in the rough from both coniferous trees (by 2.3%) and from non-coniferous trees (by 1.2%).

In the second quarter of 2026, compared to the same quarter of 2025, the prices of wood in the rough increased by 0.7%.
