Methodology

The statistical data about the newly built residential buildings and dwellings was developed on the basis of the quarterly reports obtained from the municipal administrations.

In the scope of the survey were the newly built residential buildings with approved record of handover Form 16 or a valid usage license according to Regulation № 2/31.07.2003 of the Ministry of Regional Development and Public Works.

Living floor space is the floor area of living-rooms, bedrooms, recesses for sleeping, dining-rooms, the rooms for day-stay, cabinets and libraries of scientists and drawing-rooms but does not include the areas of the kitchens.

Service floor space is the floor area of the rooms and kitchens with less than 4 square meters floor area, vestibules with a portal or an other screen, corridors, bathrooms, toilets, larders, hanging closets, other service rooms such as drying-rooms, laundries or balconies not depending on their area. The area of kitchens with over 4 sq. m floor area is shown separately.

The useful area of the dwelling is sum of the living-floor-space, service floor space and the area of the kitchens.
