### Methodological notes

In the statistical survey of **accommodation establishments** were included all categorized hotels, camping sites and other type of accommodation establishments with more than 10 bed-places in use during the reporting period.

The indicator **other accommodation establishments** contained the holiday settlements, hostels, guests houses, bungalows, rest houses, mountain chalets, private rooms and flats and other establishments for short accommodation.

The data for the item '**Available Bed Capacity**' is obtained through accumulation of the number of bed-places for each of the days of the reference period, when they were put into utilization, irrespective if they are occupied or not.

In the **revenues from nights spent** in accommodation establishments are included the sums paid by the guests, without the extra services.
