

GOODS AND PASSENGERS CARRIED AND TRANSPORT PERFORMANCE BY MODE OF TRANSPORT

Land transport

1.1 Freight transport

According to the preliminary data in the first quarter of 2010, the goods carried by land transport are 15 385.3 thousand tons or by 26.9% less as compared to the previous quarter, which is due to the decreased volume of national and international carriages by road transport. In comparison with the same period of previous year, there is reduction by 15.5%, due to decreased goods carried by the national carriages.

The transport performance in tonne-kilometres reaches 4 610.4 million tkm, which is by 12.8% less in comparison with the previous three months. Compared to the first quarter of 2009 is registered decrease by 7.8%.

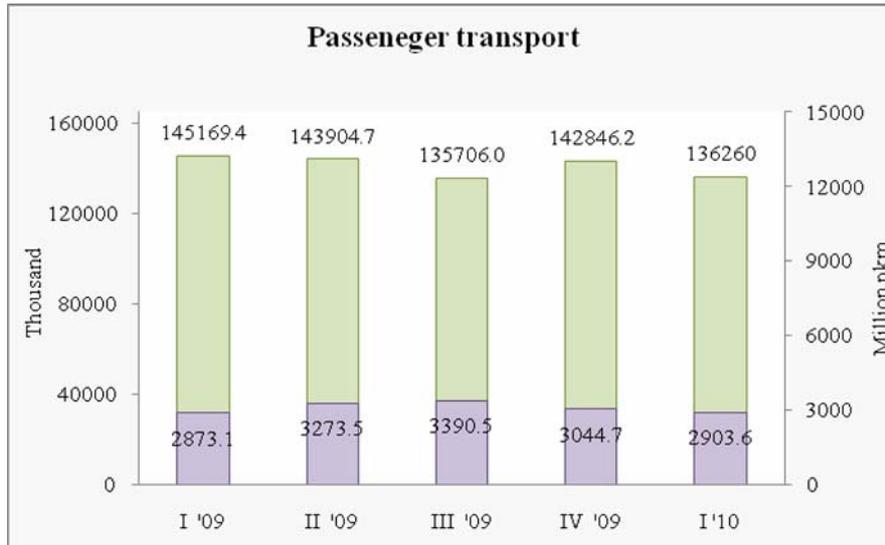

1.2 Passenger transport

Passengers transported by land transport in the first quarter of 2010 are 136 260 thousand. A decrease is registered compared to the previous quarter, as well to the first quarter of 2009, by 4.6 and 6.1% respectively.

In the international carriages the passengers transported are 288.5 thousand. There is an increase compared to the previous three months as well to the same period of 2009, by 3.3 and 36.1% respectively. Due to their low percentage in volume of transported passengers, they do not have significant influence on the general trend.

Transport performance in passengers-kilometers shows drop of 4.6% as compared to October – December 2009 and reaches 2 903.6 million pkm. There is a increase in comparison with the first quarter of 2009 by 1.1%.

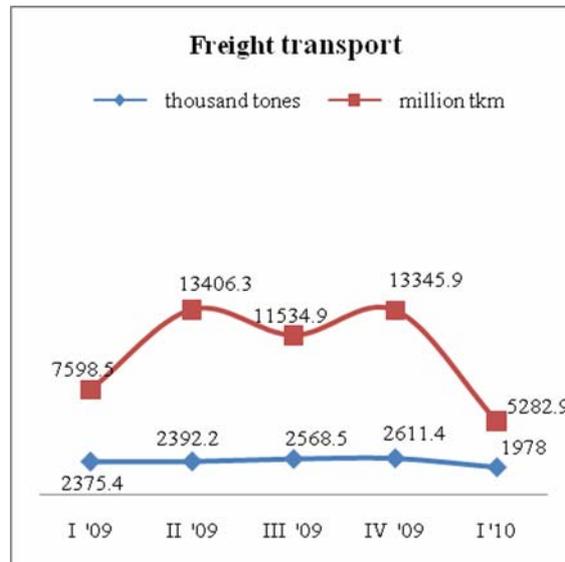

Water transport

2.1 Freight transport

Goods carried by water transport in the first quarter of 2010 are 1 978 thousand tons or by 24.3% less than the previous three months. In comparison with the same quarter of 2009 is registered also a drop by 16.7 %, mainly due to the decrease of the goods carried by the inland waterway transport.

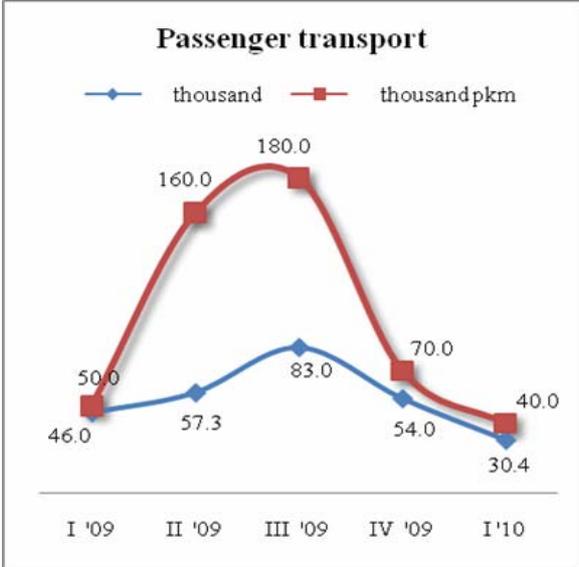

The transport performance (in tkms) is 5 282.9 million tkm or by 30.5% less than the same quarter of 2009. In comparison with the fourth quarter of 2009 the tonne-kilometres decrease by 60.4%, due to the decrease volume of the carriages by the maritime transport.

2.2 Passenger transport

The number of the passengers transported by water transport in first quarter of 2010 decrease by 43.7% as compared to the previous quarter. In comparison with the first quarter of 2009 there is also a decrease by 33.9%, mainly due to the less passengers carried by the inland waterway transport.

Transport performance in passenger-kilometers in the first quarter of 2010 shows drop compared to October-December of 2009, as well to the same quarter of 2009.

Urban electrical transport

During the first quarter of 2010 the passengers transported by urban electrical transport are 76 624 thousand. There is a decrease in comparison to the preceding quarter by 2.2%, while compared to the same period of 2009 they are by 8.3% more. The growth is a result of the increased number of travellings by underground transport.

Transport performance in pkms is 350.9 million pkm and decrease by 4.8% compared to the previous three months, but compared to the first quarter of 2010 there is an increase by 44.8%.
