

## INDUSTRIAL PRODUCTION INDICES IN OCTOBER 2013<sup>1</sup>

The preliminary data showed that the Industrial Production Index<sup>2</sup>, seasonally adjusted<sup>3</sup>, increased by 1.5% in October 2013 as compared to September 2013.

In October 2013 working day adjusted<sup>4</sup> Industrial Production Index rose by 4.1% in comparison with the same month of 2012.

**Figure 1. Industrial Production Indices (2010=100)**

<sup>1</sup> October 2013 data are preliminary.

<sup>2</sup> Monthly Industrial Production and Industrial turnover indices measure changes in production and turnover values of industrial enterprises. This information can be used to assess the current economic development and for short-term forecasts. Indices do not measure the actual production level, it aims to measure the average change in value of production between two points of time. Indices are compiled on the base of information collected through representative sampling survey on industrial enterprises. The sample covers enterprises with annual turnover more than 97% of total turnover in industry.

Industrial production indices are calculated at constant base year that is to say they are weighted with the structure of the value added at factor costs in the base year.

<sup>3</sup> Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series.

<sup>4</sup> Working day adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holidays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

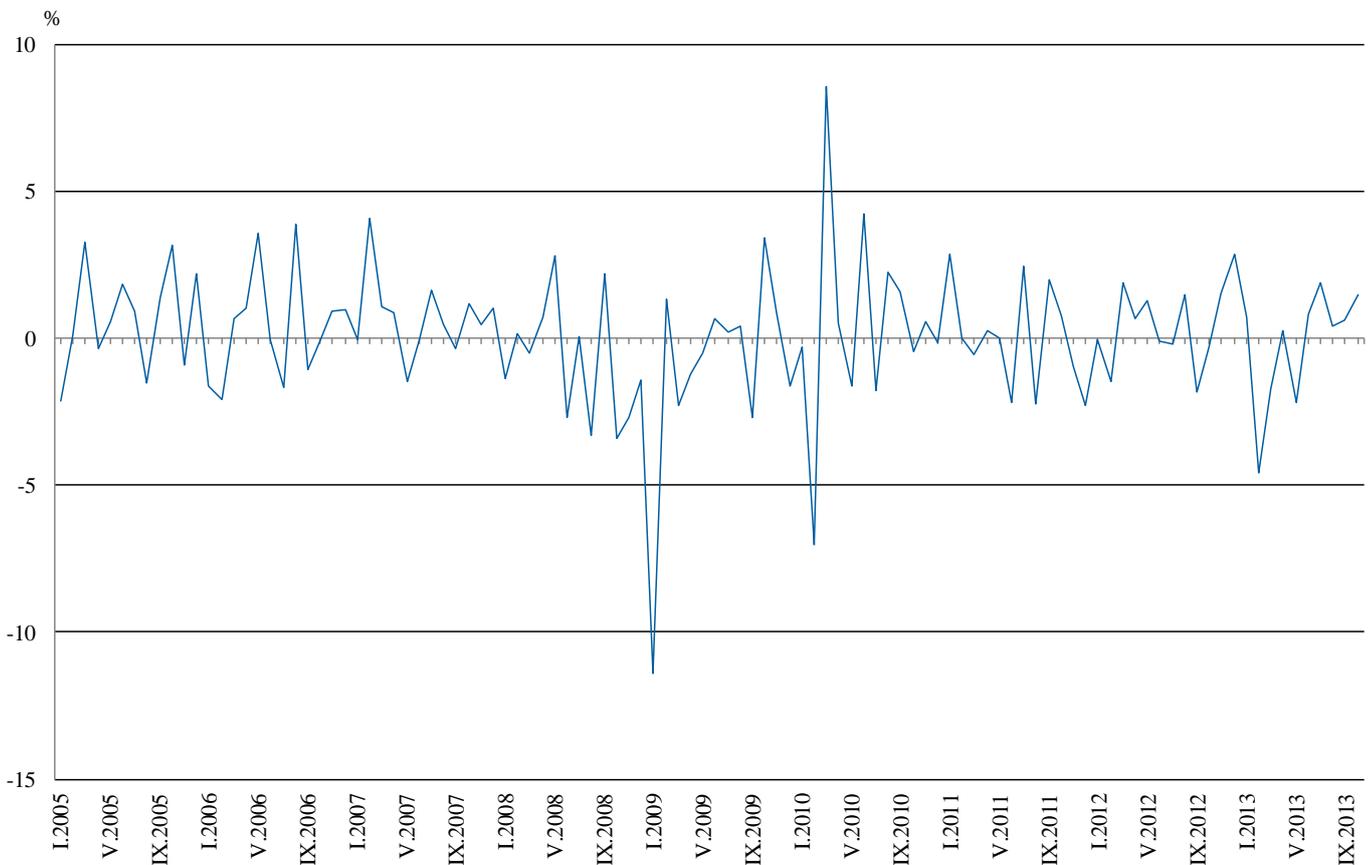

## Monthly comparisons

In October 2013 as compared to September 2013, the seasonally adjusted Industrial Production Index increased in the mining and quarrying industry by 7.5% and in the manufacturing by 2.1%, while in the electricity, gas, steam and air conditioning supply was seen a decrease by 1.2%.

The most significant increases of production in the manufacturing were registered in the manufacture of other transport equipment by 30.0%, in the manufacture of fabricated metal products, except machinery and equipment by 28.0%, in the manufacture of computer, electronic and optical products by 21.8%, in the manufacture of chemicals and chemical products by 12.7%, in the manufacture of paper and paper products by 8.5%. There was decrease in the manufacture of tobacco products by 22.5%, in the manufacture of beverages by 4.6%, in the printing and reproduction of recorded media by 3.9%, in the manufacture of rubber and plastic products by 2.1%.

**Figure 2. Percentage changes of Industrial Production Indices compared to the previous month (seasonally adjusted)**

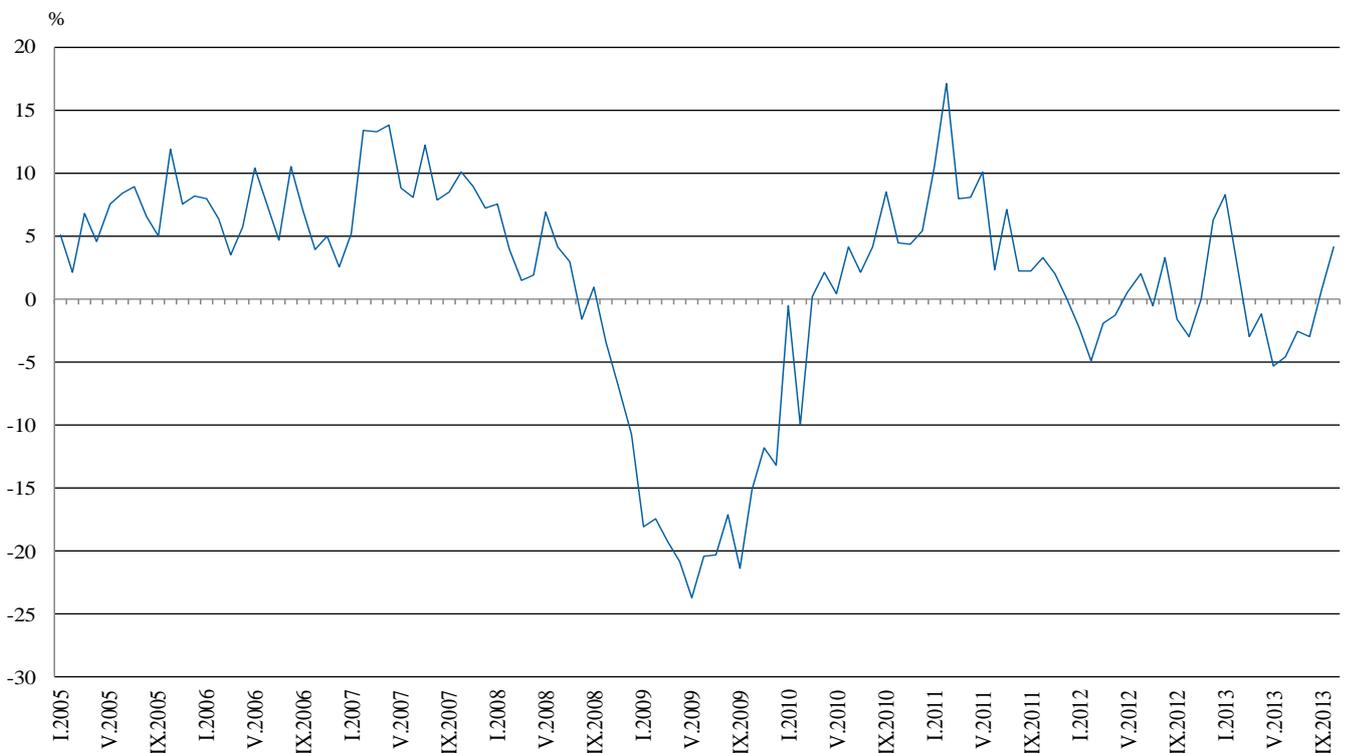

## Annual comparisons

On annual basis in October 2013 Industrial Production Index, calculated from working day adjusted data increased in the manufacturing by 5.9%, the electricity, gas, steam and air conditioning supply remained at the level of the same month of the preceding year, while in the mining and quarrying industry a decrease by 2.0% was registered.

In the manufacturing, the more significant increases compared to the same month of the previous year were seen in the manufacture of computer, electronic and optical products by 35.9%, in the manufacture of fabricated metal products, except machinery and equipment by 27.4%, in the manufacture of basic metals by 21.2%, in the manufacture of textiles by 19.5%, in the manufacture of paper and paper products by 18.1%, in the printing and reproduction of recorded media by 12.4%. Decreases were registered in the manufacture of other transport equipment by 15.7%, in the repair and installation of machinery and equipment by 9.3%, in the manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials by 5.5%, in the manufacture of tobacco products by 5.2%.

**Figure 3. Percentage changes of Industrial Production Indices compared to the same month of the previous year**

(working day adjusted)

The final data on Industrial Production and Turnover Indices for September 2013 can be found in NSI internet web-site: (<http://www.nsi.bg/otrasalen.php?otr=46>).
