

Module on Wellbeing 2013

The Commission Regulation (EU) № 62/2012 presents the list of target secondary variables relating to housing conditions. Module 2013 includes questions relating to the overall perception of life, material living conditions, productive activities and evaluation of activities, governance and fundamental entitlements, free time and social interaction.

All questions from the module are asked at individual level and all persons in the household aged 16 and older answer them. Proxy interview is not allowed. Reference period for almost all target variables is the current situation (at the time of interview). The issues that are associated with the emotional well-being of the respondent refer to the last 4 weeks.

The main characteristics of the 2013 Module are the following:

- **Unit** - Information should be provided for all current household members, or if applicable, for all selected respondents, aged 16 and over.
- **Mode of data collection** - Given the type of information to be collected, only personal interviews are allowed. In particular, proxy interviews are not allowed.
- **Reference period** - The reference period for all target variables is the current situation, except for the five variables on emotional well-being, which refer to the past four weeks.
- **Data transmission** - The target secondary variables should be sent to the Commission (Eurostat) in the Personal Data File (P-file) after the target primary variables.
- **Target variables:** Module 2013 contains 22 variables collected at the individual level. These variables are the following:

Overall perception of life

- PW020: Meaning of life - From 0 (Not worthwhile at all) to 10 (Completely worthwhile)
