

## **Registered noise levels**

### **1. Purpose, nature and relevance**

The purpose of this statistical survey is to obtain information about the number of points of noise registration and measured noise levels in decibels. Statistical survey on registered noise levels is carried out in accordance with the National environmental noise monitoring system.

### **2. Coverage and sources of information**

Statistical survey on registered noise levels is with annual periodicity and has exhaustive character covering all points for noise registration within the country.

Source of data is the National Centre of Public Health Protection.

Data is collected via electronic questionnaire.

### **3. Deadlines and ways of dissemination of the survey results**

The deadline for dissemination of the results of statistical survey on registered noise levels is specified in the *Calendar for presentation of the results of statistical surveys carried out by the National Statistical Institute*. Data is published once a year as final data. The survey results are published on NSI website – [www.nsi.bg](http://www.nsi.bg) and in the following publications:

- "Statistical Yearbook"
- "Statistical Reference Book"
- Publication "Environment"
