

ECONOMIC ACCOUNTS FOR AGRICULTURE FOR 2015 (FIRST ESTIMATION)

According to first estimate on economic accounts for agriculture of the National Statistical Institute, prepared as of November 2015, the real income index¹ (income at factor cost) in agriculture decreased by 16.3% as compared to 2014.

Compared with a year ago the net operating surplus/net mixed income in agriculture² decreased by 18.7% and the net entrepreneurial income³ decreased by 20.5%.

The final output⁴ at basic prices⁵ in agriculture in 2015 amounted to 7 626.0 million BGN that is by 9.4% less than a year ago. The decrease is due to decrease of volume - by 10.2%.

In 2015 the value of intermediate consumption in agriculture amounted to 4 586.9 million BGN. Compared to 2014 it decreased by 8.8% as a result of reducing the amount of both the price and the volume in the investments made.

Gross value added in agriculture in 2015 amounted to 3 039.1 million BGN and decreased by 10.3% as compared with a year ago. The decrease is due to the reducing of volume - by 16.4%.

¹ The real income index in agriculture represent a ratio between the nominal value of the income at factor cost in agriculture in 2015 and its nominal value in 2014, deflated by the estimated value of the implicit index of GDP for 2015. The estimated value supplied by Eurostat is 98.4%.

² Net operating surplus/net mixed income (calculated after deduction of compensation of employees and other taxes on production and adding other subsidies on production from the net value added at basic prices) measures the income of the use of land, capital and non-salaried labour input.

³ The net entrepreneurial income (calculated after adding to the net operating surplus/net mixed income the interests, received by agricultural holdings, operating as companies and deducting the interests and rents, paid by them) measures the compensation of non-salaried labour, the remuneration from land, belonging of agricultural holdings and the income from the use of capital.

⁴ The final output does not include the output, produced and consumed at same economic activity.

⁵ Basic prices include subsidies on products but exclude taxes on products.
