Industrial Production Indices in June 2011¹

The preliminary data showed that the Industrial Production Index², seasonally adjusted³, decreased by 1.5% in June 2011 as compared to May 2011.

In June 2011 working day adjusted⁴ Industrial Production Index rose by 2.2% as compared to the same month of 2010.

Figure 1. Industrial Production Indices (2005 = 100)

The seasonally and working day adjusted data on Industrial production index for the period 2000-2010 can be found in NSI internet web-site: (http://www.nsi.bg/otrasalen.php?otr=46).

¹June 2011 data are preliminary.

² Monthly Industrial Production and Industrial turnover indices measure changes in **production and turnover values** of industrial enterprises. This information can be used to access the current economic development and for short-term forecasts. Indices do not measure the actual production level, it aims to measure the average change in value of production between two points of time

Indices are compiled on the base of information collected through representative sampling survey on industrial enterprises. The sample covers enterprises with annual turnover more than 97% of total turnover in industry.

Industrial production indices are calculated at constant base year (2005) that is to say they are weighted with the structure of the value added at factor costs in the base year.

³ Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series and it is particularly suitable for long-term comparisons and analysis of the data.

⁴ Working day adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holydays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

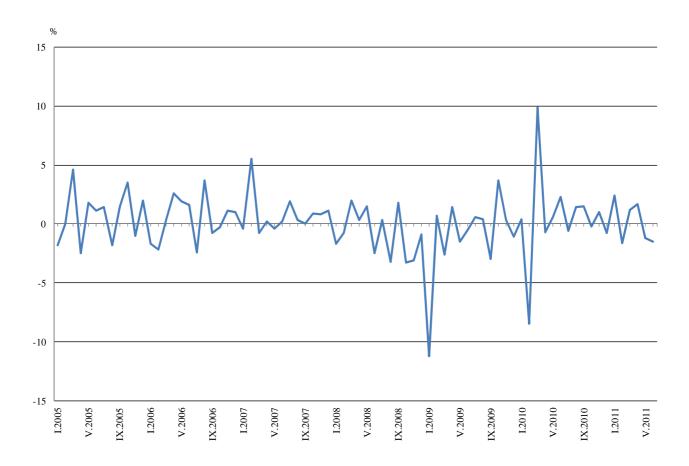

www.esi.bg

Monthly comparisons

In June 2011 as compared to May 2011, the seasonally adjusted Industrial Production Index in the mining and quarrying industry decreased by 14.2%, in the electricity, gas, steam and air conditioning supply by 3.1% and in the manufacturing by 0.4%.

The most significant decreases of production in the manufacturing were seen in the manufacture of chemicals and chemical products by 9.9%, in the manufacture of basic metals by 8.0%, in the manufacture of rubber and plastic products by 5.3%. There was increase in the manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials by 12.6%, in the manufacture of basic pharmaceutical products and pharmaceutical preparations by 7.5%, in the manufacture of tobacco products by 7.4%.

Figure 2. Percentage changes of Industrial Production Indices compared to the previous month (Seasonaly adjusted)

reverse resident

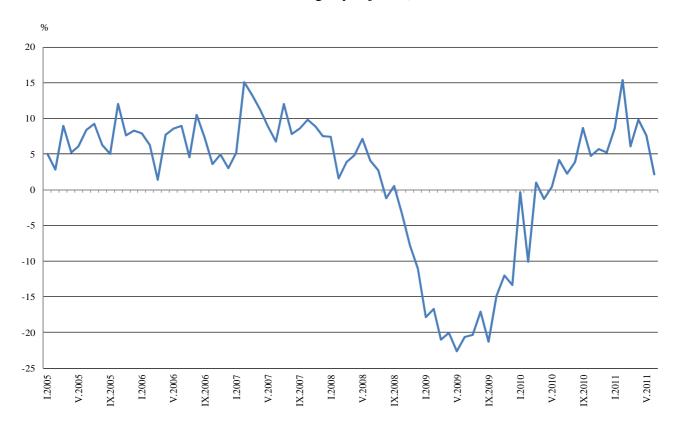

Annual comparisons

On annual bases in June 2011 Industrial Production Index, calculated from working day adjusted data in the manufacturing grew by 4.5%, while decreases were seen in the mining and quarrying industry by 5.4% and in the electricity, gas, steam and air conditioning supply by 2.8%.

Increases were registered in the production of intermediate goods by 5.8% and in the production of investment goods by 1.6%, while the production of energy went down by 1.5%.

Figure 3. Percentage changes of Industrial Production Indices compared to the same month of the previous year

(Working day adjusted)

The final data on Industrial Production and Turnover Indices for May 2011 can be found in NSI internet web-site: (http://www.nsi.bg/otrasalen.php?otr=46).
