

INDUSTRIAL PRODUCTION INDICES IN FEBRUARY 2013¹

In compliance with Regulation (EC) N_{2} 1165/98 and amendment Regulation (EC) N_{2} 1158/2005 since January 2013 the base year for Short-term business statistics has been changed. All short-term indicators presented in the form of index are calculated and published at 2010 as a base year. The time series has been recalculated according to the new base year and are posted on the website of NSI: <u>http://www.nsi.bg/otrasalen.php?otr=55</u>.

The preliminary data showed that the Industrial Production Index², seasonally adjusted³, decreased by 2.0% in February 2013 as compared to January 2013.

In February 2013 working day adjusted⁴ Industrial Production Index rose by 5.1% in comparison with the same month of 2012.

¹ February 2013 data are preliminary.

² Monthly Industrial Production and Industrial turnover indices measure changes in production and turnover values of industrial enterprises. This information can be used to access the current economic development and for short-term forecasts. Indices do not measure the actual production level, it aims to measure the average change in value of production between two points of time Indices are compiled on the base of information collected through representative sampling survey on industrial enterprises. The sample covers enterprises with annual turnover more than 97% of total turnover in industry.

Industrial production indices are calculated at constant base year that is to say they are weighted with the structure of the value added at factor costs in the base year.

³ Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series and it is particularly suitable for long-term comparisons and analysis of the data.

⁴ Working day adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holydays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

The seasonally and working day adjusted data on Industrial production index by months, starting from January 2000 can be found in NSI internet web-site: (<u>http://www.nsi.bg/otrasalen.php?otr=46</u>).

Industrial production index -seasonally adjusted

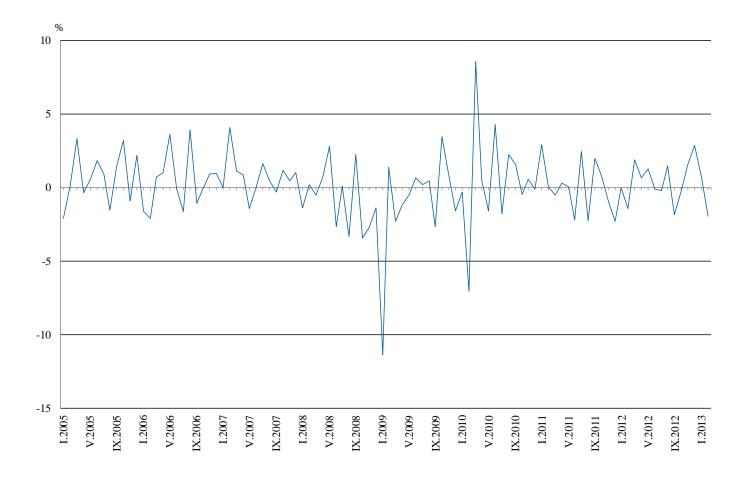

Monthly comparisons

In February 2013 as compared to January 2013, the seasonally adjusted Industrial Production Index decreased in the electricity, gas, steam and air conditioning supply by 9.4%, in the mining and quarrying industry by 5.4% and in the manufacturing by 0.7%.

The most significant decreases of production in the manufacturing were seen in the manufacture of basic metals by 39.9%, in the manufacture of fabricated metal products, except machinery and equipment by 12.6%, in the manufacture of textiles by 11.4%, in the manufacture of beverages by 8.4%, in the manufacture of chemicals and chemical products by 8.3%, in the manufacture of food products by 6.0%. There was increase in the manufacture of computer, electronic and optical products by 18.0%, in the manufacture of paper and paper products by 8.7%, in the manufacture of tobacco products by 6.7%.

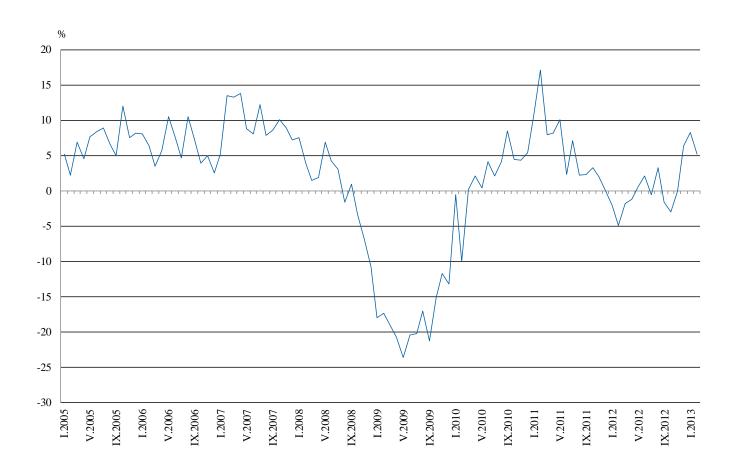

Annual comparisons

On annual basis in February 2013 Industrial Production Index, calculated from working day adjusted data increased in the manufacturing by 7.4% and in the electricity, gas, steam and air conditioning supply by 3.6%, while in the mining and quarrying industry a decrease by 6.0% was seen.

In the manufacturing, the more significant increases compared to the same month of the previous year were seen in the manufacture of other non-metallic mineral products by 41.5%, in the manufacture of paper and paper products by 41.0%, in the manufacture of rubber and plastic products by 29.3%, in the manufacture of basic pharmaceutical products and pharmaceutical preparations by 14.3%, in the manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials by 12.3%. Decreases were registered in the manufacture of basic metals by 11.0%, in the manufacture of chemicals and chemical products by 10.8%, the manufacture of food products by 10.5%.

The final data on Industrial Production and Turnover Indices for January 2013 can be found in NSI internet web-site: (<u>http://www.nsi.bg/otrasalen.php?otr=46</u>).
