

## INDUSTRIAL PRODUCTION INDICES IN DECEMBER 2014<sup>1</sup>

According to the preliminary data the Industrial Production Index<sup>2</sup>, seasonally adjusted<sup>3</sup>, increased by 1.1% in December 2014 as compared to November 2014.

In December 2014 working day adjusted<sup>4</sup> Industrial Production Index rose by 0.9% in comparison with the same month of 2013.

**Figure 1. Industrial Production Indices (2010 = 100)**

<sup>1</sup> December 2014 data are preliminary.

<sup>2</sup> Monthly Industrial Production and Industrial turnover indices measure changes in production and turnover values of industrial enterprises. This information can be used to assess the current economic development and for short-term forecasts. Indices do not measure the actual production level, it aims to measure the average change in value of production between two points of time. Indices are compiled on the base of information collected through representative sampling survey on industrial enterprises. The sample covers enterprises with annual turnover more than 97% of total turnover in industry.

Industrial production indices are calculated at constant base year that is to say they are weighted with the structure of the value added at factor costs in the base year.

<sup>3</sup> Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series.

<sup>4</sup> Working day adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holidays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

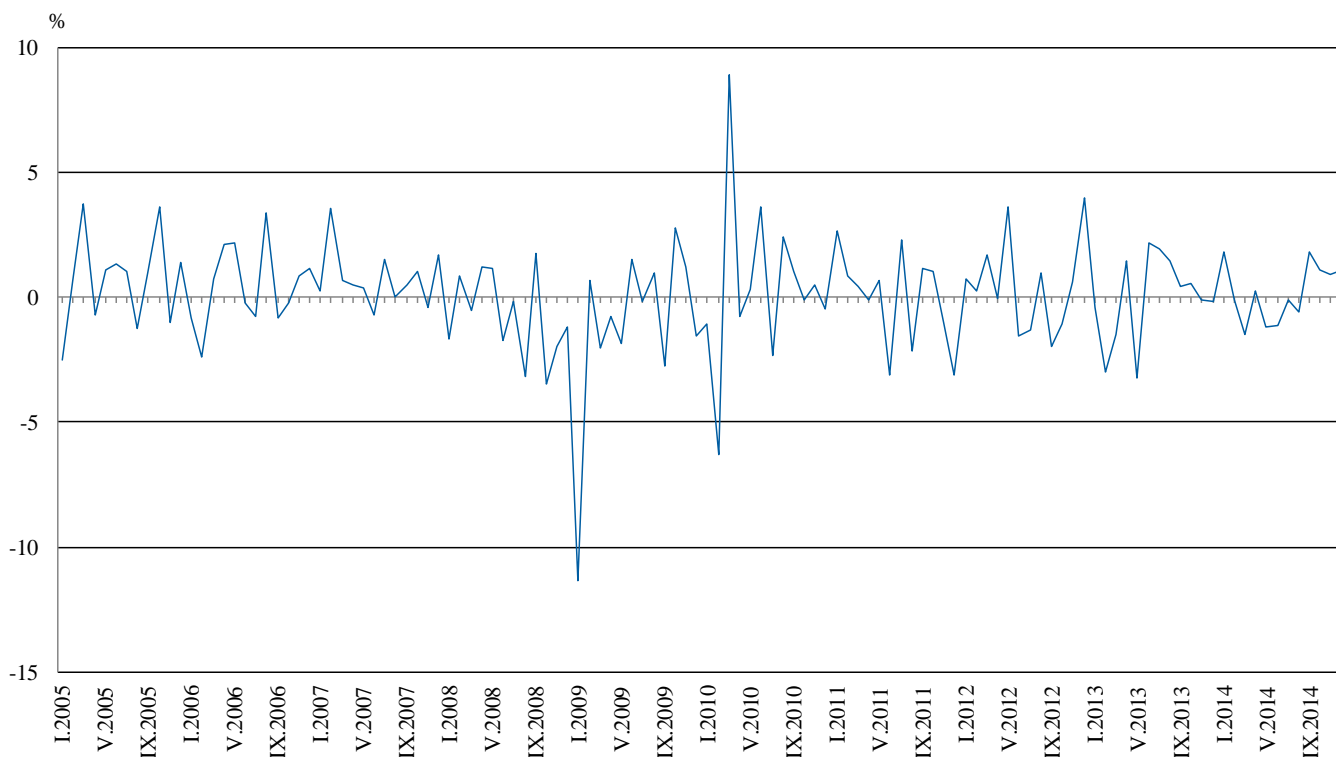

## Monthly comparisons

In December 2014 as compared to November 2014, the seasonally adjusted Industrial Production Index increased in the mining and quarrying industry by 2.1%, in the electricity, gas, steam and air conditioning supply by 1.1% and in the manufacturing by 1.0%.

The most significant increases of production in the manufacturing were registered in the manufacture of basic metals by 11.4%, in the manufacture of basic pharmaceutical products and pharmaceutical preparations by 8.6%, in the manufacture of tobacco products by 7.3%, in the manufacture of textiles by 5.6%, in the manufacture of motor vehicles, trailers and semi-trailers by 5.2%. There were decreases in the repair and installation of machinery and equipment by 26.1%, in the manufacture of machinery and equipment by 11.2%, in the manufacture of computer, electronic and optical products by 7.2%.

**Figure 2. Changes of Industrial Production Indices compared to the previous month (Seasonally adjusted)**

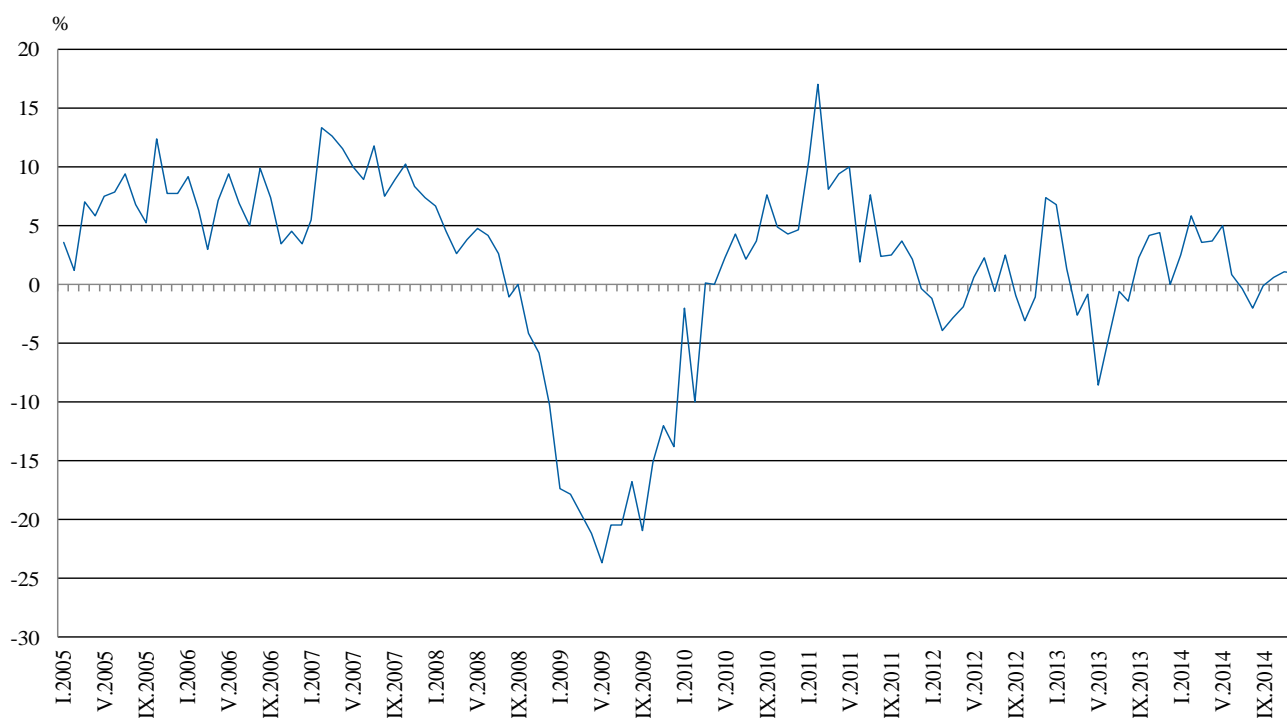

## Annual comparisons

On annual basis in December 2014 Industrial Production Index calculated from working day adjusted data increased in the manufacturing by 6.8% while decreases were seen in the mining and quarrying industry by 15.3% and in the electricity, gas, steam and air conditioning supply by 3.1%.

In the manufacturing, the more significant increases compared to the same month of the previous year were seen in the manufacture of motor vehicles, trailers and semi-trailers by 53.9%, in the manufacture of fabricated metal products, except machinery and equipment by 26.2%, in the manufacture of leather and related products by 21.2%, in the manufacture of basic pharmaceutical products and pharmaceutical preparations by 18.7%, in the manufacture of textiles by 14.8%, in the manufacture of tobacco products by 13.7%. Decreases were registered in the manufacture of machinery and equipment by 7.3%, in the manufacture of beverages by 6.5%, in the manufacture of wearing apparel by 3.7%.

**Figure 3. Changes of Industrial Production Indices compared to the same month of the previous year (Working day adjusted)**

The final data on Industrial Production and Turnover Indices for November 2014 can be found on the NSI website: <http://www.nsi.bg/en>.
