

INDUSTRIAL PRODUCTION INDICES IN MAY 2018¹

According to the preliminary data the Industrial Production Index², seasonally adjusted³, increased by 1.8% in May 2018 as compared to April 2018.

In May 2018 working day adjusted⁴ Industrial Production Index remained at the level of the same month of 2017.

Figure 1. Industrial Production Indices (2015 = 100)

¹ May 2018 data are preliminary. The final data on Industrial Production and Turnover Indices for April 2018 can be found on the NSI website: <http://www.nsi.bg/en>.

² Monthly Industrial Production and Industrial turnover indices measure changes in production and turnover values of industrial enterprises. This information can be used to access the current economic development and for short-term forecasts. Indices do not measure the actual production level, it aims to measure the average change in value of production between two points of time. Indices are compiled on the base of information collected through representative sampling survey on industrial enterprises. The sample covers enterprises with annual turnover more than 97% of total turnover in industry.

Industrial production indices are calculated at constant base year that is to say they are weighted with the structure of the value added at factor costs in the base year.

³ Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series.

⁴ Working day adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holidays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

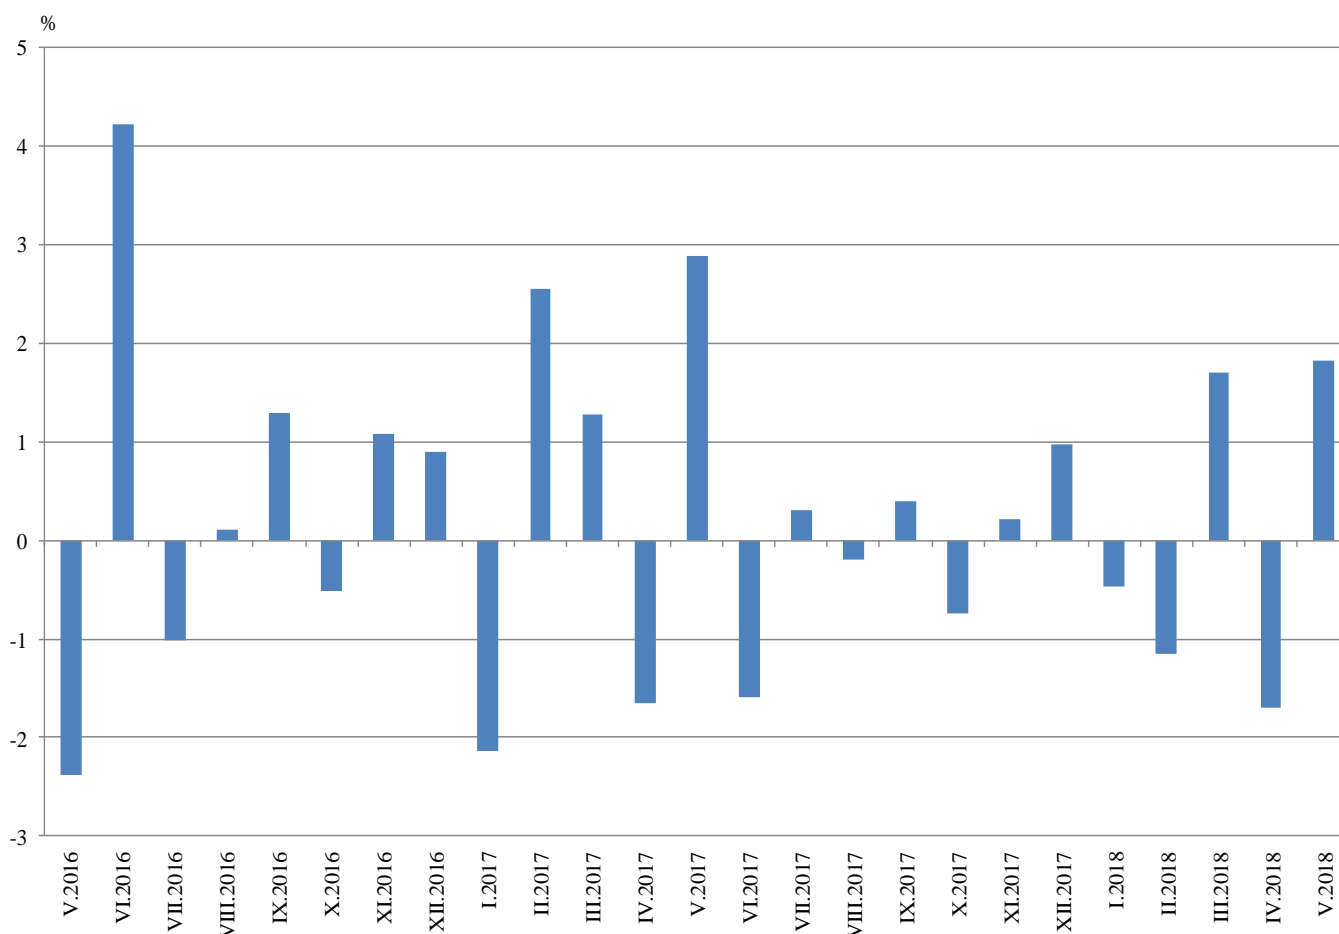

Monthly comparisons

In May 2018 as compared to April 2018, the seasonally adjusted Industrial Production Index rose in the manufacturing by 2.6% and in the mining and quarrying industry by 0.8%, while in the electricity, gas, steam and air conditioning supply the production decreased by 0.4%.

The most significant production increases in the manufacturing were registered in the repair and installation of machinery and equipment by 11.5%, in the manufacture of fabricated metal products, except machinery and equipment by 9.4%, in the manufacture of beverages by 7.4%, in the manufacture of furniture by 7.3%. There were decreases in the manufacture of other transport equipment by 5.3%, in the manufacture of machinery and equipment n.e.c. by 4.2%, in the manufacture of textiles by 2.2%, in the manufacture of computer, electronic and optical products by 2.1%.

**Figure 2. Changes of Industrial Production Indices compared to the previous month
(Seasonally adjusted)**

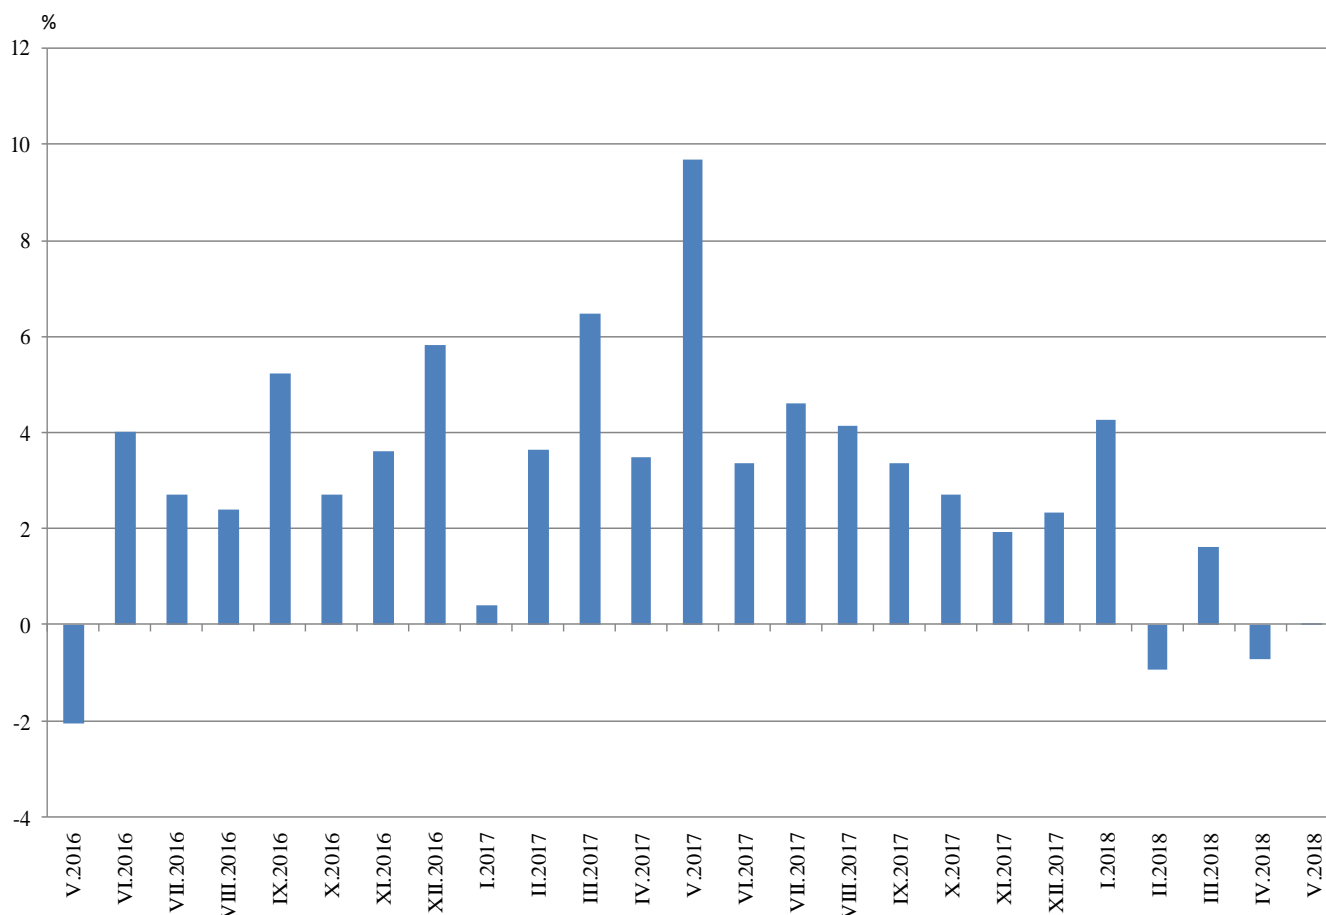

Annual comparisons

On annual basis in May 2018 Industrial Production Index calculated from working day adjusted data rose in the manufacturing by 0.7%, while the production fell in the mining and quarrying industry by 8.2%, and in the electricity, gas, steam and air conditioning supply by 6.0%.

In the manufacturing, the more considerable increases compared to the same month of the previous year were registered in the manufacture of other transport equipment by 25.3%, in the manufacture of motor vehicles, trailers and semi-trailers by 18.9%, in the repair and installation of machinery and equipment by 13.9%, in the manufacture of rubber and plastic products and in the manufacture of electrical equipment by 12.1%. Decreases were seen in the manufacture of tobacco products by 21.2%, in the manufacture of fabricated metal products, except machinery and equipment by 10.3%, in the manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials and in the manufacture of machinery and equipment n.e.c. by 9.8%, in the manufacture of textiles by 7.7%.
