

## INDUSTRIAL PRODUCTION INDICES IN JANUARY 2021<sup>1</sup>

According to the preliminary data in January 2021 the Industrial Production Index<sup>2</sup>, seasonally adjusted<sup>3</sup>, increased by 0.8 % as compared to December 2020.

In January 2021 the working day adjusted<sup>4</sup> Industrial Production Index fell by 3.4% in comparison with the same month of 2020.

**Figure 1. Industrial Production Indices (2015 = 100)**

<sup>1</sup> January 2021 data are preliminary. The final data on Industrial Production and Turnover Indices for December 2020 can be found on the NSI website: <http://www.nsi.bg/en>.

<sup>2</sup> Monthly Industrial Production and Industrial turnover indices measure changes in production and turnover values of industrial enterprises. This information can be used to assess the current economic development and for short-term forecasts. Indices do not measure the actual production level, it aims to measure the average change in value of production between two points of time. Indices are compiled on the base of information collected through representative sampling survey on industrial enterprises. The sample covers enterprises with annual turnover more than 97% of total turnover in industry.

Industrial production indices are calculated at constant base year that is to say they are weighted with the structure of the value added at factor costs in the base year.

<sup>3</sup> Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series.

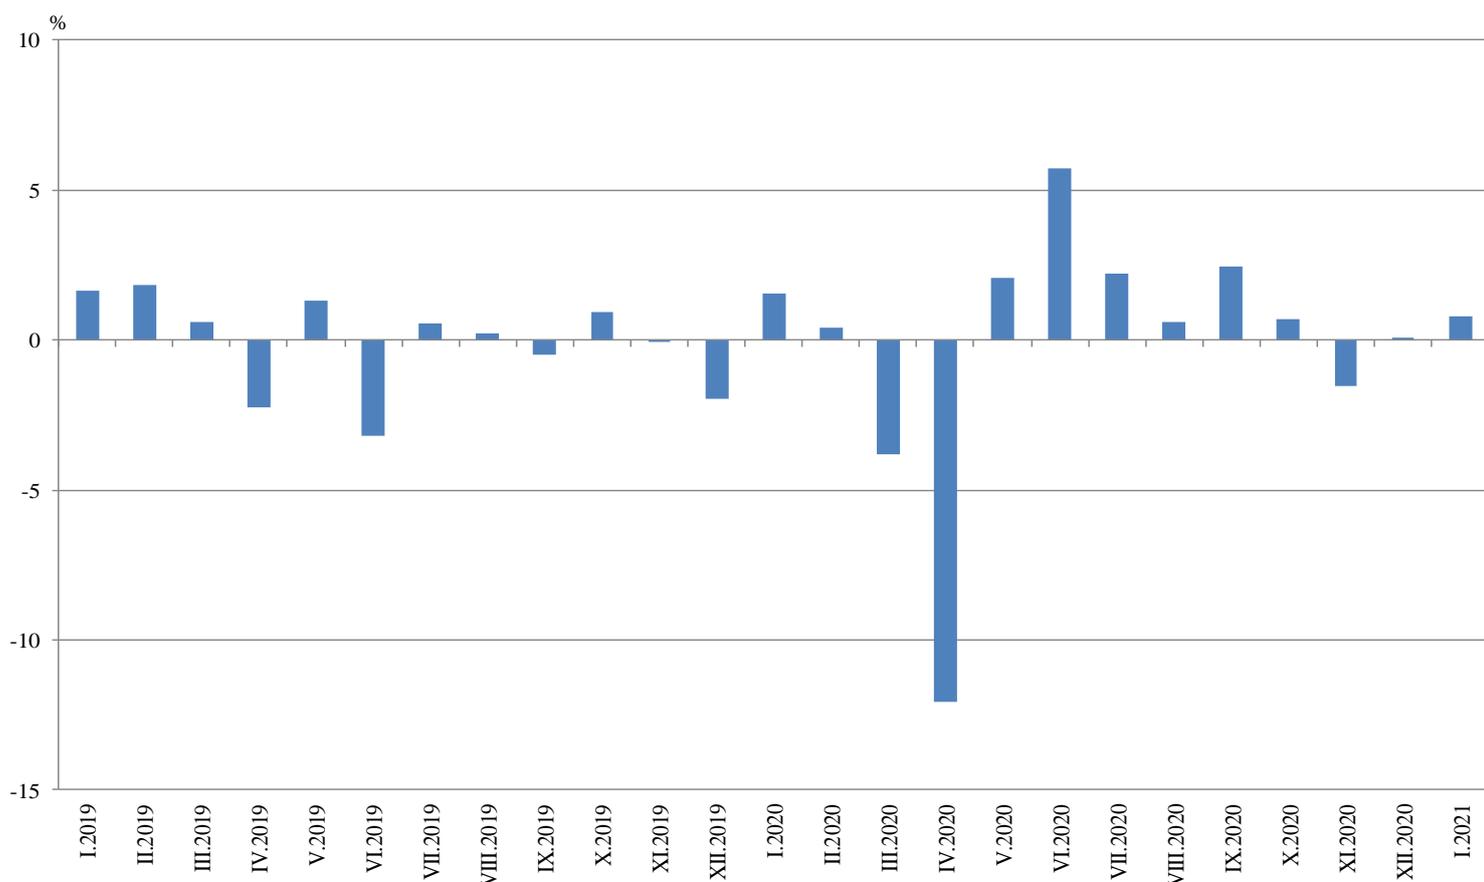

<sup>4</sup> Working day adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holidays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

## Monthly changes

In January 2021 as compared to December 2020, the seasonally adjusted Industrial Production Index rose in manufacturing by 2.1% and in the electricity, gas, steam and air conditioning supply by 1.2%, while in the mining and quarrying industry the industrial production decreased by 13.1%.

The most significant increase in the manufacturing was seen in the manufacture of computer, electronic and optical products by 19.6%, in the manufacture of other transport equipment by 18.5%, in the manufacture of fabricated metal products, except machinery and equipment by 13.4% and in the repair and installation of machinery and equipment by 10.4%. Major decrease was seen in the manufacturing of tobacco products - by 20.3%, in the manufacture of motor vehicles, trailers and semi-trailers by 12.4% and in the manufacture of basic pharmaceutical products and pharmaceutical preparations by 3.7%.

**Figure 2. Changes of Industrial Production Indices compared to the previous month  
(Seasonally adjusted)**

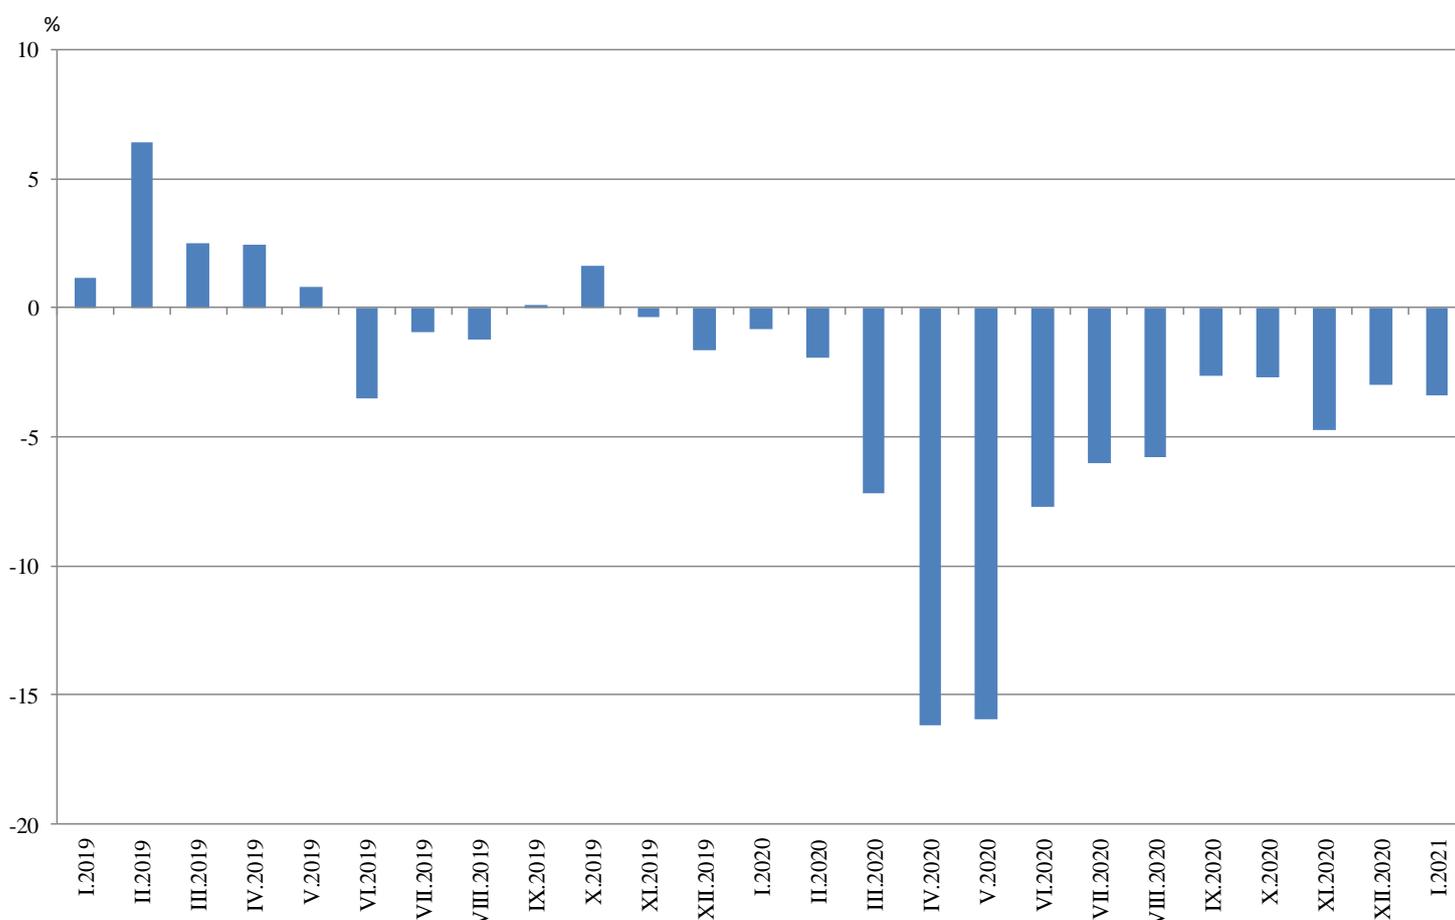

### Annual changes

On annual basis in January 2021 Industrial Production Index calculated from working day adjusted data fell in the mining and quarrying industry by 17.8%, in the manufacturing by 2.7% and in the electricity, gas, steam and air conditioning supply by 1.4%.

In the manufacturing, more considerable decrease compared to the same month of the previous year was registered in the other manufacturing by 46.1%, in the repair and installation of machinery and equipment by 28.5%, in the manufacture of leather and related products by 27.5%, in manufacture of beverages by 26.5% and in the manufacture of tobacco products by 24.8%. Major increase was seen in the manufacture of computer, electronic and optical products by 34.0%, in the manufacture of electrical equipment by 18.1%, in the manufacture of rubber and plastic products by 13.4% and in the manufacture of furniture by 8.3%.
