

#### INDUSTRIAL PRODUCTION INDICES IN JANUARY 20241

The Industrial Production Index<sup>2</sup> decreased by 2.5% in January 2024 compared to the previous month. The data are preliminary and seasonally adjusted<sup>3</sup>.

In comparison with January 2023, a decline of 7.5% was registered in the calendar-adjusted<sup>4</sup> Industrial Production Index.

Figure 1. Industrial Production Indices (2015 = 100)

<sup>&</sup>lt;sup>1</sup> January 2024 data are preliminary. The final data on Industrial Production and Turnover Indices for December 2023 can be found on the NSI website: <a href="http://www.nsi.bg/en">http://www.nsi.bg/en</a>.

<sup>&</sup>lt;sup>2</sup> The Monthly Industrial Production and Industrial Turnover Indices measure changes in production and turnover values of industrial enterprises. This information can be used to access the current economic development and for short-term forecasts. Indices do not measure the actual production level; they aim to measure the average change in the value of production between two points in time. Indices are compiled based on information collected through a representative sampling survey on industrial enterprises. The sample covers enterprises with an annual turnover of more than 97% of the total turnover in the industry.

Industrial Production Indices are calculated at a constant base year that is to say they are weighted with the structure of the value added at factor costs in the base year.

<sup>&</sup>lt;sup>3</sup> Seasonal adjustment is a statistical method, which eliminates the seasonal component of the time series.

<sup>&</sup>lt;sup>4</sup> Calendar-adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holidays and outliers (for example, the presence of more non-working days in May could contribute to the decline in production in some activities).

### Monthly changes

In January 2024, compared to the previous month, a decrease was seen in the mining and quarrying industry - by 10.7%, in the manufacturing - by 2.5%, and in the electricity, gas, steam and air conditioning supply - by 0.8%.

A more significant decline in manufacturing was observed in the manufacture of tobacco products - by 24.3%, in the manufacture of other transport equipment - by 23.7%, in the manufacture of other non-metallic mineral products - by 15.8%, in the manufacture of leather and related products - by 15.7%, and in manufacture of machinery and equipment n.e.c. - by 12.6%.

An increase was reported in the manufacture of basic pharmaceutical products and pharmaceutical preparations - by 20.9%, in the manufacture of fabricated metal products, except machinery and equipment - by 16.3%, in the manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials - by 13.9%, in the manufacture of chemicals and chemical products - by 13.8%, and in the manufacture of computer, electronic and optical products - by 12.8%.

Figure 2. Changes of Industrial Production Indices compared to the previous month (Seasonally adjusted)

#### **Annual changes**

On an annual basis, a drop of the Industrial Production Index was observed in the manufacturing - by 10.4%, in the mining and quarrying industry - by 8.2%, while an increase was registered in the electricity, gas, steam and air conditioning supply - by 7.8%.

A most significant production decrease in manufacturing, compared to the same month of the previous year, was registered in the manufacture of other transport equipment - by 51.3%, in the manufacture of tobacco products - by 50.8%, in the manufacture of textiles - by 30.2%, in the manufacture of other non-metallic mineral products - by 28.2%, and in the manufacture of leather and related products - by 27.5%.

An increase was seen in the printing and reproduction of recorded media - by 12.4%, and in the manufacture of basic pharmaceutical products and pharmaceutical preparations - by 8.2%.
