

## INDUSTRIAL PRODUCTION INDICES IN JUNE 2024

The Industrial Production Index decreased by 0.2% in June 2024 compared to the previous month. The data are preliminary and seasonally adjusted.

In comparison with June 2023, a decrease of 5.2% was registered in the calendar-adjusted Industrial Production Index.

**Figure 1. Industrial Production Indices (2015 = 100)**

### Monthly changes

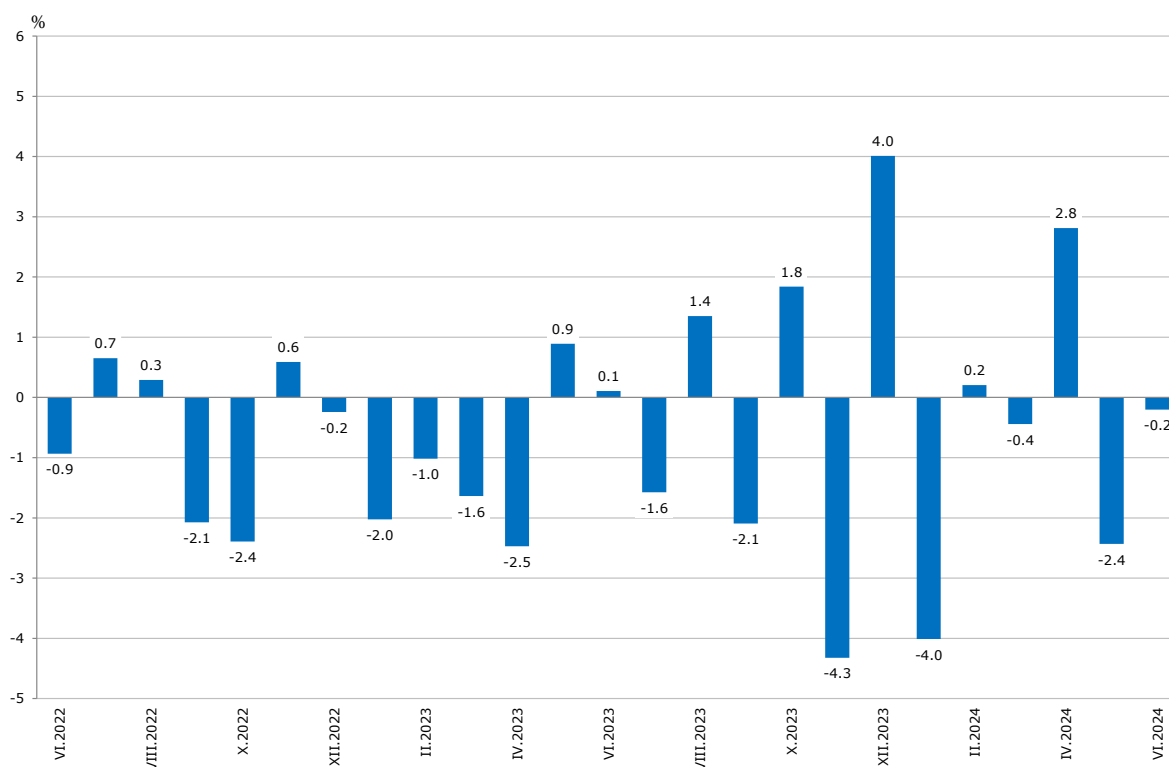

In June 2024, compared to the previous month, a decrease was seen in the electricity, gas, steam and air conditioning supply - by 15.8%, while an increase was registered in the manufacturing - by 2.2%, and in the mining and quarrying industry - by 0.7%.

A more significant increase in the manufacturing was registered in the manufacture of computer, electronic and optical products - by 7.7%, in the manufacture of chemicals and chemical products - by 7.4%, in the manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials - by 5.9%, and in the printing and reproduction of recorded media - by 5.7%.

## INDUSTRIAL PRODUCTION INDICES IN JUNE 2024

A decrease was reported in the manufacture of tobacco products - by 7.1%, in the manufacture of leather and related products - by 6.3%, and in the manufacture of furniture - by 4.7%.

**Figure 2. Changes of Industrial Production Indices compared to the previous month  
(Seasonally adjusted)**

### Annual changes

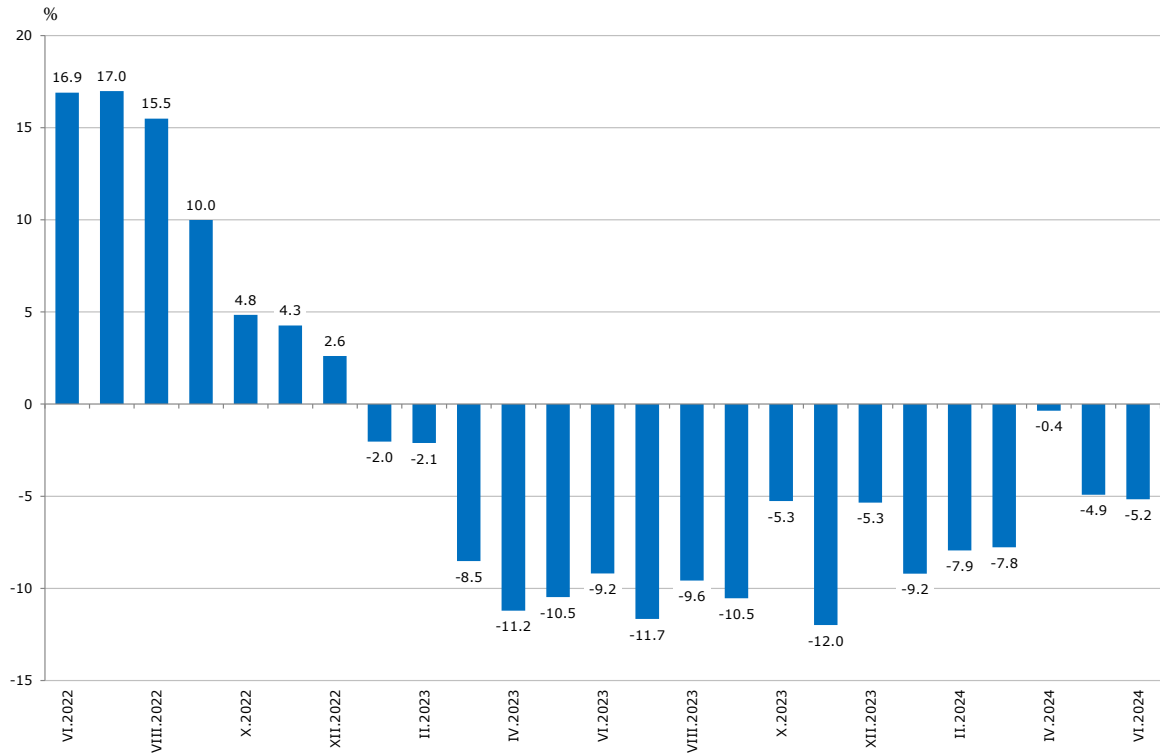

On an annual basis, a drop of the Industrial Production Index was observed in the electricity, gas, steam and air conditioning supply - by 17.2%, in the mining and quarrying industry - by 17.0%, and in the manufacturing - by 2.4%.

The most significant production decrease in the manufacturing, compared to the same month of the previous year, was registered in the manufacture of leather and related products - by 32.5%, in the manufacture of other transport equipment - by 28.1%, and in the manufacture of electrical equipment - by 25.3%.

A growth was seen in the manufacture of chemicals and chemical products - by 33.8%, and in the manufacture of basic metals - by 25.4%.

## INDUSTRIAL PRODUCTION INDICES IN JUNE 2024

**Figure 3. Changes of Industrial Production Indices compared to the same month of the previous year (Calendar-adjusted)**

### **Methodological notes**

Monthly indices of industrial production are calculated in accordance with the requirements of Regulation (EU) 2019/2152 of the European Parliament and of the Council on European Business Statistics.

The Monthly Industrial Production and Industrial Turnover Indices measure changes in production and turnover values of industrial enterprises. This information can be used to assess the current economic development and for short-term forecasts. Indices do not measure the actual production level; they aim to measure the average change in the value of production between two points in time. Indices are compiled based on information collected through a representative sampling survey on industrial enterprises. The sample covers enterprises with an annual turnover of more than 97% of the total turnover in the industry.

Industrial Production Indices are calculated at a constant base year that is to say they are weighted with the structure of the value added at factor costs in the base year.

Seasonal adjustment is a statistical method, which eliminates the seasonal component of the time series.

Calendar adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holidays and outliers (for example, the presence of more non-working days in May could contribute to the decline in production in some activities).
