

INFLATION AND CONSUMER PRICE INDICES IN AUGUST 2023

The monthly inflation rate was 0.4%, while the annual inflation rate was 7.7%. The inflation rate is measured by the CPI, with monthly inflation referring to the month of August 2023 compared to the previous month, and annual inflation being for August 2023 compared to the same month of the previous year.

In August 2023, compared to the previous month, the highest increase was recorded in the prices for Transport (+4.6%), Health (+0.6%), Restaurants and hotels (+0.6%) and Miscellaneous goods and services (+0.4%). The decrease was registered for Clothing and footwear (-2.3%), Communications (-0.6%) and Housing, water, electricity, gas and other fuels (-0.3%).

Consumer Price Index (CPI)

In August 2023, the **monthly inflation** rate was 0.4% compared to the previous month, and the **annual inflation** rate in August 2023 compared to August 2022 was 7.7%¹.

The inflation rate since the beginning of the year (August 2023 compared to December 2022) was 3.7%, and the annual average inflation rate for the period September 2022 - August 2023 compared to the period September 2021 - August 2022 was 13.4%.

Figure 1. Inflation, measured by CPI, by month

In August 2023, compared to the previous month, the prices of goods and services increased in the following consumer groups:

¹ According to the CPI methodology. For more information, see the Methodological notes on pages 4 and 5 and Annex, Table 1.

- Transport - an increase of 4.6%;
- Health - an increase of 0.6%;
- Restaurants and hotels - an increase of 0.6%;
- Miscellaneous goods and services - an increase of 0.4%;
- Alcoholic beverages and tobacco - an increase of 0.3%;
- Furnishings, household equipment and routine maintenance of the house - an increase of 0.2%;
- Food and non-alcoholic beverages - an increase of 0.2%;
- Recreation and culture - an increase of 0.2%;
- Education - an increase of 0.1%.

In August 2023, compared to the previous month, the prices of goods and services decreased in the following consumer groups:

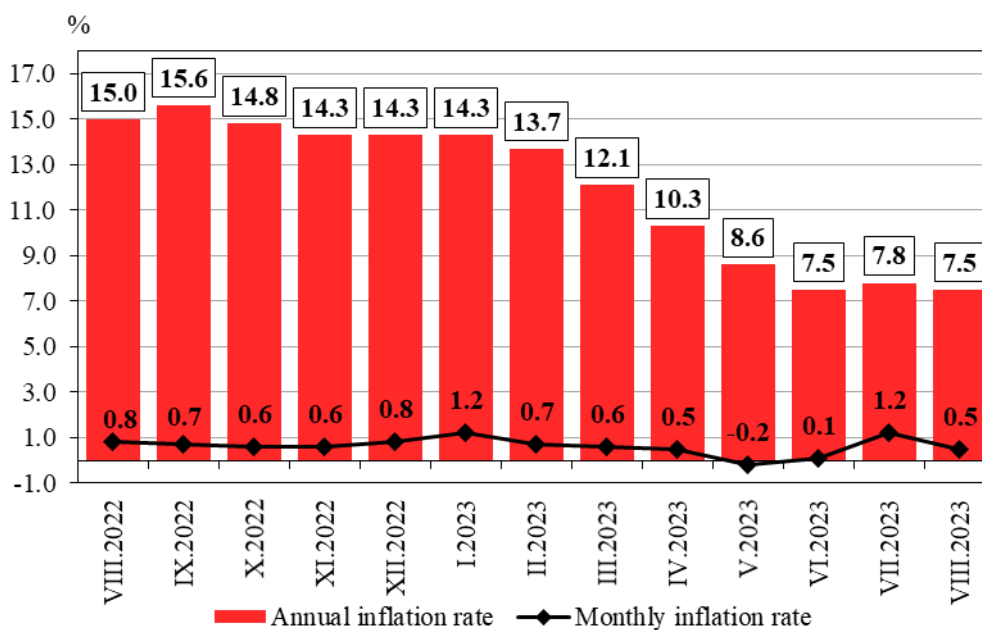

- Clothing and footwear - a decrease of 2.3%;
- Communications - a decrease of 0.6%;
- Housing, water, electricity, gas and other fuels - a decrease of 0.3%.

Harmonized Index of Consumer Prices (HICP)

In August 2023, the **monthly inflation** rate, measured by HICP, was 0.5% compared to the previous month, and the **annual inflation** rate in August 2023 compared to August 2022 was 7.5%¹.

The inflation rate since the beginning of the year (August 2023 compared to December 2022) was 4.6%, and the annual average inflation rate for the period September 2022 - August 2023 compared to the period September 2021 - August 2022 was 11.6%.

Figure 2. Inflation, measured by HICP, by month

¹ According to the HICP methodology. For more information, see the Methodological notes on pages 4 and 5 and Annex, Table 2.

In terms of HICP, in August 2023, compared to the previous month, the prices of goods and services increased in the following consumer groups:

- Transport - an increase of 3.3%;
- Health - an increase of 0.6%;
- Restaurants and hotels - an increase of 0.4%;
- Food and non-alcoholic beverages - an increase of 0.2%;
- Alcoholic beverages and tobacco - an increase of 0.2%;
- Furnishings, household equipment and routine maintenance of the house - an increase of 0.2%;
- Miscellaneous goods and services - an increase of 0.2%;
- Education - an increase of 0.1%.

In August 2023, compared to the previous month, the prices of goods and services decreased in the following consumer groups:

- Clothing and footwear - a decrease of 2.2%;
- Communications - a decrease of 0.6%;
- Housing, water, electricity, gas and other fuels - a decrease of 0.2%.

The prices of Recreation and culture remained unchanged.

Price Index of a Small Basket (PISB)

In August 2023, according to the **Price Index of a Small Basket**, the prices remained unchanged on a monthly basis, and a price increase of 3.2% since the beginning of the year (August 2023 compared to December 2022)¹ was registered.

In August 2023, compared to the previous month, the prices of goods and services in the small basket for the 20% of households with the lowest income changed as follows:

- Food products - an increase of 0.2%;
- Non-food products - a decrease of 0.3%.

The prices of Services remained unchanged.

¹ For more information, see the Methodological notes on pages 4 and 5 and Annex, Table 3.

Methodological notes

The **Consumer Price Index (CPI)** is the official measure of inflation in the Republic of Bulgaria. It measures the total relative price change of goods and services used by households for private (non-production) consumption. It is calculated by applying the structure of Bulgarian households' final monetary consumption expenditures. The main source of information for the expenditures is the household budget survey in the country. The CPI in year t is calculated with the expenditures' structure of year $t - 1$.

The **Harmonized Index of Consumer Prices (HICP)** is the comparable measure of inflation across EU Member States. It is one of the criteria for price stability and the readiness of Bulgaria to join the Eurozone. HICP, as well as CPI, measures the total relative price change of goods and services. Both indices are calculated using the same basket of goods and services but differ with concern to the weights used. HICP is calculated using weights, which reflect the individual and collective consumption of all households (incl. institutional and foreign households) in the country's economic territory. The main source of information for HICP weights is the national accounts (NA) data. For calculating the HICP in 2023, NA data for households' final monetary consumption expenditures (HFMCE) - domestic concept in 2021 is used. NA 2021 data are reviewed and updated to make them representative of 2022, following Eurostat's methodological guidance on the compilation of HICP weights in case of large changes in consumer expenditures¹.

In compliance with Regulation (EC) No. 2015/2010, **since January 2016, the base year for the HICP has changed**, and all indices have been calculated and published using **2015 as a base year**. The time series have been recalculated according to the new base year and have been posted on the NSI website (www.nsi.bg).

The **Price Index of a Small Basket (PISB)** measures the relative average price changes of 100 socially useful and vital living goods and services. The weights of this index reflect the expenditures of the 20% lowest households' incomes. The source of the information on weights is the Households Budget Survey in the country. This index in year t is calculated with the weights of year $t - 1$.

The **chain** consumer price indices measure the price change in the current month compared to the previous month. The chain consumer price indices are used as a measure of **monthly inflation**.

The **12-month** consumer price indices measure the price changes occurring between the current month and the same month of the previous year. The 12-month consumer price indices are used as a measure of **annual inflation**.

¹ Guidance on the compilation of HICP weights in case of large changes in consumer expenditures, Eurostat, Directorate C, Macro-economic statistics, 3.02.2020:
<https://ec.europa.eu/eurostat/documents/10186/10693286/Guidance-on-the-compilation-of-HICP-weights-in-case-of-large-changes-in-consumer-expenditures.pdf>.

Consumer price indices **over December of the previous year** measure the accumulated changes in prices of the current month concerning December of the previous year. Consumer price indices over December of the previous year are used as measures of **inflation since the beginning of the year**. In December of each year, the 12-month index is equal to the index over December of the previous year.

The **annual average** consumer price indices measure the average price change during the 12 months of the current year compared to the average price change during the 12 months of the previous year. The annual average consumer price indices are used as a measure of the **annual average inflation**.
