Methodological notes

Foreign direct investment is an investment, which includes long-term relationship, referring to a significant degree of influence of a resident of a foreign economy (foreign direct investor) on the management of an enterprise - resident of the Bulgarian economy (investment enterprise). Direct investment comprises not only the initial transaction establishing the relationship between the investor and the enterprise but also all subsequent transactions between them.

The volume of the foreign direct investment in the investment enterprise is defined as a sum of:

- The foreign share in the equity capital of the enterprise;
- Plus the amount of the unpaid part of long and short-term loans and trade credits granted by the foreign investor to the investment enterprise as of 31.12. of the surveyed year;
- Minus the amount of unpaid part of the long and short-term loans and trade credits granted by the investment enterprise to the foreign investor as of 31.12. of the surveyed year.

The expenditure on acquisition of tangible fixed assets during the period under review include the actual costs: land purchase and building construction, construction equipment and mechanisms through order and produced by own account, for delivery and installation of tangible fixed assets, for machinery, equipment and means of transport, for geological and hydrological prospecting, for research and design related to construction and other expenditure, connected with acquiring tangible fixed assets.

The current maintenance cost of existing tangible fixed assets is not included in the volume of expenditure on acquisition of tangible fixed assets.
