

PRODUCER PRICE INDICES IN INDUSTRY¹

OCTOBER 2011

1. Producer Price Indices on Domestic Market²

Producer Price Index on Domestic Market in October 2011 decreased by 0.1% compared to the previous month. The domestic prices fell in the mining and quarrying industry by 7.6% and in the manufacturing by 0.1%, while in the electricity, gas, steam and air conditioning supply the prices grew by 1.4%.

In the manufacturing, the more significant prices decreases compared to the previous month were seen in the manufacture of basic metals by 4.3% and in the manufacture of textiles by 1.2%.

Producer Price Index on Domestic Market in October 2011 grew by 6.5% compared to the same month of 2010. The domestic prices increased in the manufacturing by 8.9% and in the electricity, gas, steam and air conditioning supply by 3.4%, while in the mining and quarrying industry the prices went down by 3.8%.

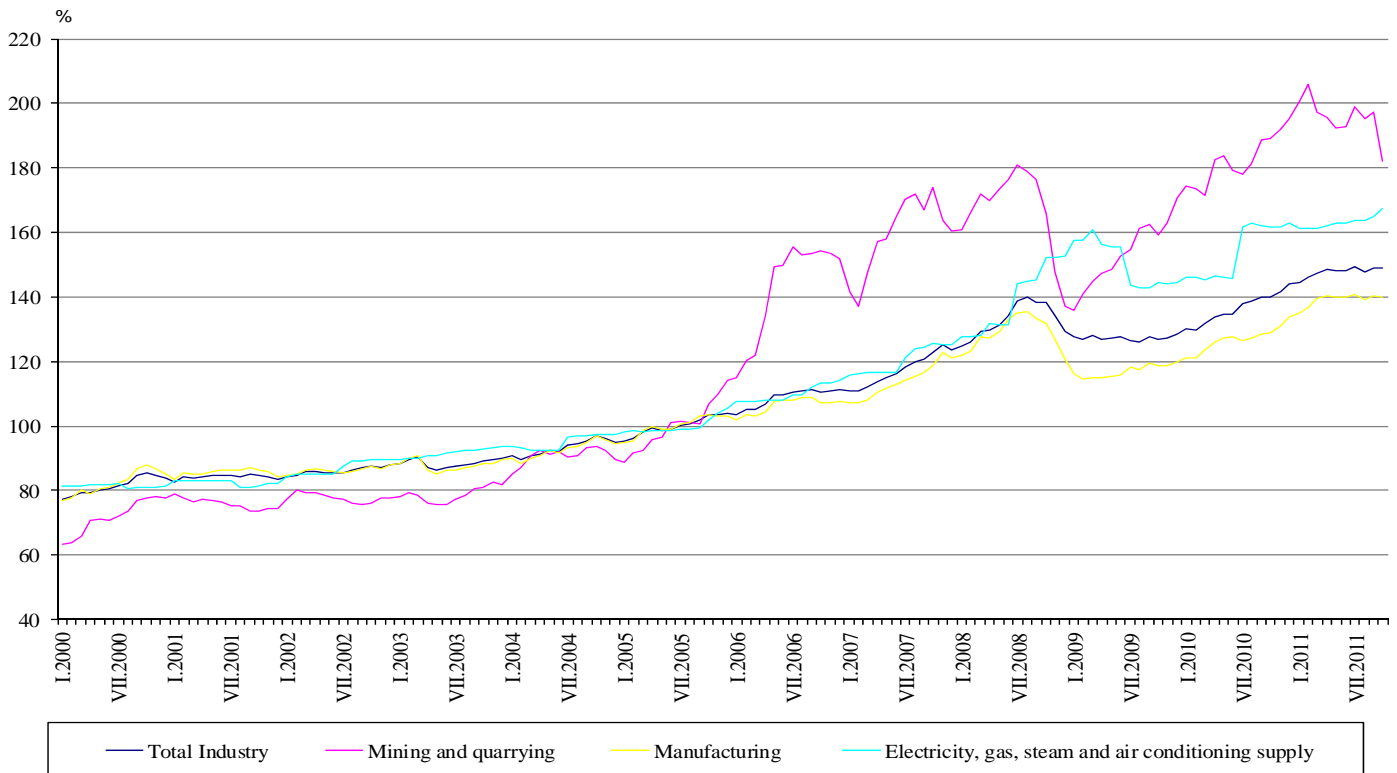

In the manufacturing compared to the same month of 2010, the price increase was registered in the manufacture of chemical and chemical products by 11.8%, in the manufacture of food products by 11.2%, in the repair and installation of machinery and equipment by 10.0%. The prices reductions were seen in the manufacture of other transport equipment and in the manufacture of other non-metallic mineral products by 1.1%.

¹**Producer Price Indices** measure the average change in the prices of industrial products, which are produced and sold by Bulgarian enterprises. They can be considered as an early measure of the current inflation process in the economy and also they can be used for international comparisons. Information for calculation of Producer Price Indices is received on the bases of monthly surveys on producer prices of industrial products, sold on domestic market and on industrial products sold on non-domestic market. Producer price surveys are based on constant sample of groups of products, and that sample is representative for total industrial production.

² **Producer Price Indices on domestic market** are calculated at constant base (2005) weighed with turnover structure on domestic market.

(2005 = 100)**

2. Total Producer Price Indices in Industry³

Total Producer Price Index in Industry in October 2011 decreased by 1.5% compared to the previous month. The lower prices were registered in the mining and quarrying industry by 5.0% and in the manufacturing by 2.1%, while in the electricity, gas, steam and air conditioning supply the prices grew by 1.4%.

In the manufacturing, more significant prices decreases were seen in the manufacture of basic metals by 12.3%, in the manufacture of textiles by 0.5%, while the prices went up in the repair and installation of machinery and equipment by 1.3% and in the manufacture of beverages by 1.0%.

³ Total Producer Price Index is calculated from Producer Price Index on Domestic Market and Producer Price Index on Non-domestic Market weighted with the turnover structure on domestic and on non-domestic market to the total value of turnover in the base year 2005.

Total Producer Price Index in October 2011 grew by 7.3% comparing to the same month of 2010.

In the manufacturing, the prices rose by 8.4% as compared to October 2010. More significant prices increases were seen in the manufacture of food products by 9.4%, in the repair and installation of machinery and equipment by 9.0% and in the manufacture of textiles by 7.5%, while the producer prices went down in the manufacture of other non-metallic mineral products by 0.8%.
