

PRODUCER PRICE INDICES IN INDUSTRY¹, JANUARY 2013

In compliance with Regulation (EC) № 1165/98 and amendment Regulation (EC) № 1158/2005 since January 2013 the base year for Short-term business statistics has been changed. All short-term indicators presented in the form of index is calculated and published at 2010 as a base year. The time series has been recalculated according to the new base year and with the publication of data for the first reporting period of 2013 they can be found on the website of NSI:

1. Producer Price Indices on Domestic Market²

Producer Price Index on Domestic Market in January 2013 decreased by 0.8% compared to the previous month. The domestic prices fell in the mining and quarrying industry by 1.0% in the manufacturing by 0.4% and in the electricity, gas, steam and air conditioning supply by 1.6%.

In the manufacturing³, compared to the previous month the prices went down in the manufacture of basic metals by 0.9%, in the manufacture of paper and paper products by 0.5% and in the manufacture of textiles by 0.4%.

Producer Price Index on Domestic Market in January 2013 grew by 2.6% compared to the same month of 2012. The domestic prices increased in the manufacturing by 1.1% and in the electricity, gas, steam and air conditioning supply by 5.8%, while in the mining and quarrying industry a decrease by 1.4% was seen.

In the manufacturing compared to January 2012, the prices increase was registered in the manufacture food products by 8.3%, in the manufacture of beverages by 6.7%, in the manufacture of leather and related products by 6.5%, in the manufacture of computer, electronic and optical products and in the manufacture of other transport equipment by 5.3%. The prices reductions were seen in the manufacture of basic metals by 3.4% and in the manufacture of basic pharmaceutical products and pharmaceutical preparations by 1.5%.

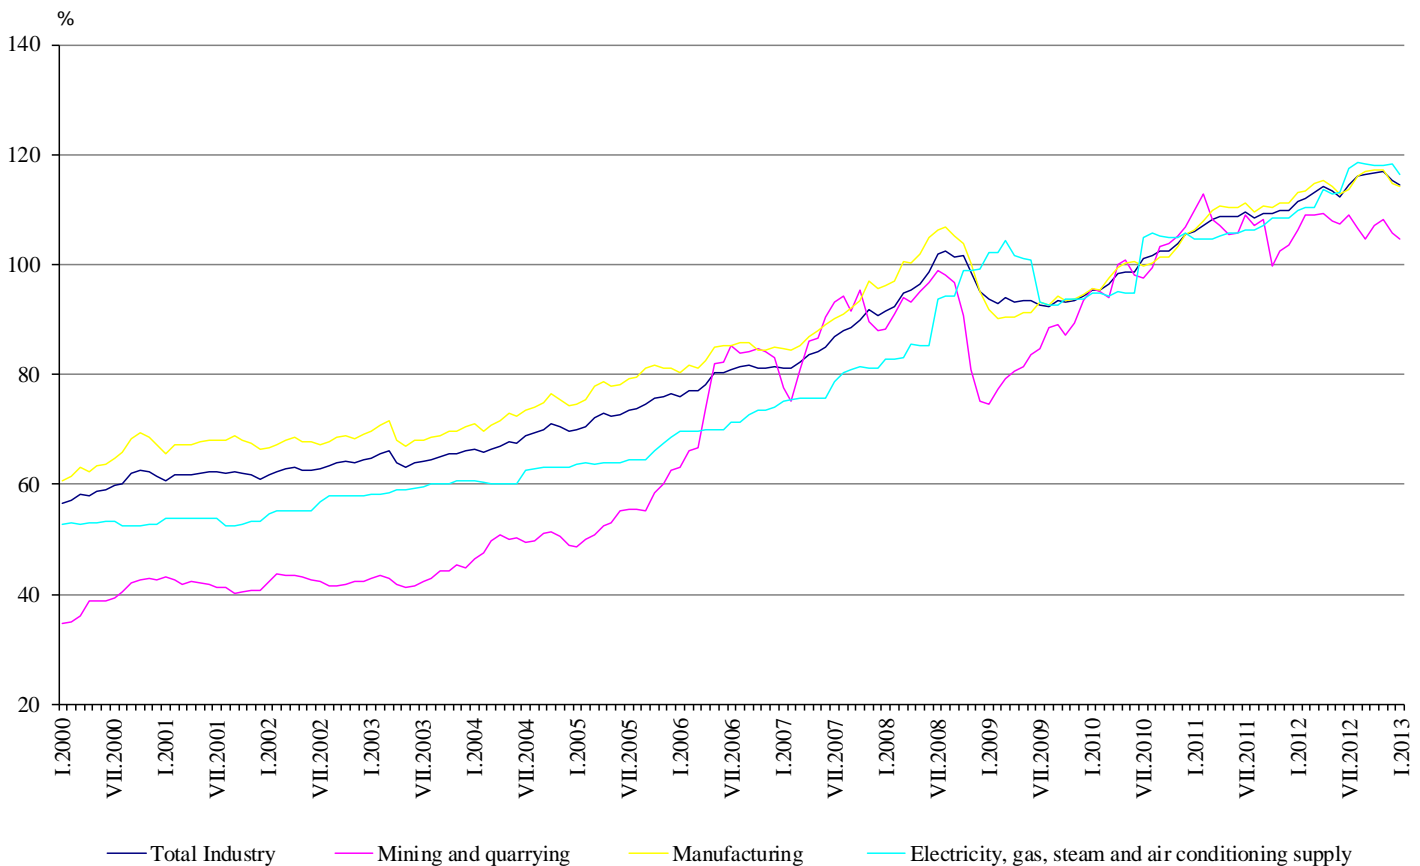

¹Producer Price Indices measure the average change in the prices of industrial products, which are produced and sold by Bulgarian enterprises. They can be considered as an early measure of the current inflation process in the economy and also they can be used for international comparisons. Information for calculation of Producer Price Indices is received on the bases of monthly surveys on producer prices of industrial products, sold on domestic market and on industrial products sold on non-domestic market. Producer price surveys are based on constant sample of groups of products, and that sample is representative for total industrial production.

² Producer Price Indices on domestic market are calculated at constant base weighed with turnover structure on domestic market.

2. Total Producer Price Indices in Industry¹

Total Producer Price Index in Industry in January 2013 decreased by 0.5% compared to the previous month. The lower prices were registered in the mining and quarrying industry by 0.9%, in the manufacturing by 0.1% and in the electricity, gas, steam and air conditioning supply by 1.5%.

In the manufacturing², more significant prices decreases were seen in the manufacture of paper and paper products by 0.5% and in the manufacture of basic metals by 0.4%.

¹ Total Producer Price Index is calculated from Producer Price Index on Domestic Market and Producer Price Index on Non-domestic Market weighted with the turnover structure on domestic and on non-domestic market to the total value of turnover in the base year.

² In the text are not quoted the activities that according to the Law on Statistics are confidential and in this way they are statistical secrecy.
