

PRODUCER PRICE INDICES IN INDUSTRY¹, SEPTEMBER 2013

1. Producer Price Indices on Domestic Market²

Producer Price Index on Domestic Market in September 2013 decreased by 0.2% compared to the previous month. The domestic prices fell in the mining and quarrying industry by 1.6%, in the manufacturing by 0.2%, while in the electricity, gas, steam and air conditioning supply the prices remained at the level of the previous month.

In the manufacturing³, compared to the previous month the prices went down in the manufacture of food products by 1.9%, in the manufacture of chemicals and chemical products by 1.0% and in the manufacture of other transport equipment by 0.7%, while a price increase was seen and in the manufacture of paper and paper products by 1.4% and in the manufacture of leather and related products by 0.8%.

Producer Price Index on Domestic Market in September 2013 decreased by 3.5% compared to the same month of 2012. The domestic prices fell in the mining and quarrying industry by 8.0%, in the manufacturing by 2.8% and in the electricity, gas, steam and air conditioning supply by 4.9%.

In the manufacturing compared to September 2012, a price decrease was registered in the manufacture of basic metals by 5.4%, in the manufacture of food products by 2.3%, and in the manufacture of chemicals and chemical products by 2.1%. The prices increases were seen in the manufacture of leather and related products by 9.1%, in the repair and installation of machinery and equipment by 6.4%, in the manufacture of fabricated metal products, except machinery and equipment by 4.5%.

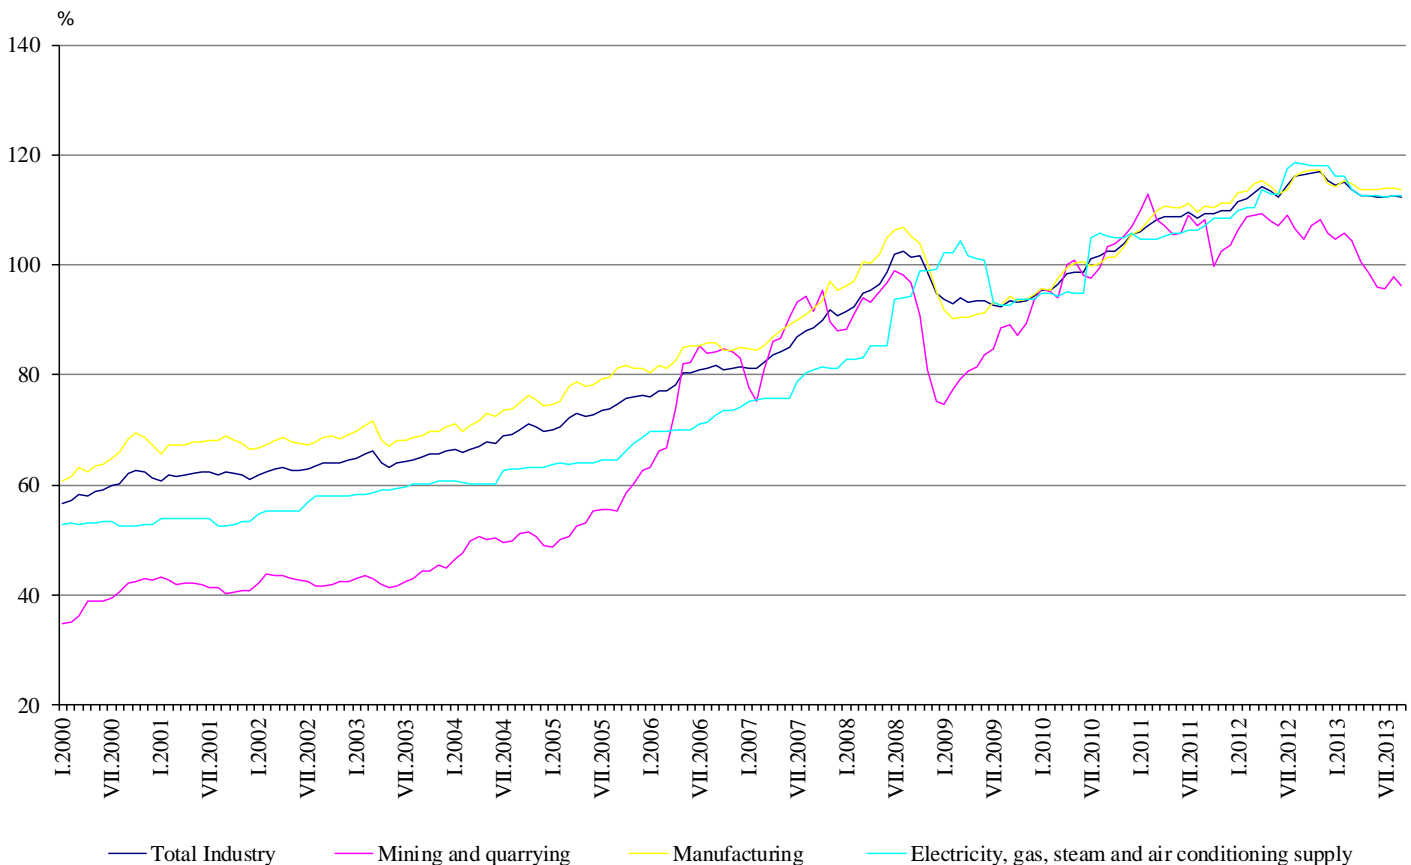

¹Producer Price Indices measure the average change in the prices of industrial products, which are produced and sold by Bulgarian enterprises. They can be considered as an early measure of the current inflation process in the economy and also they can be used for international comparisons. Information for calculation of Producer Price Indices is received on the bases of monthly surveys on producer prices of industrial products, sold on domestic market and on industrial products sold on non-domestic market. Producer price surveys are based on constant sample of groups of products, and that sample is representative for total industrial production.

² Producer Price Indices on domestic market are calculated at constant base (2010) weighed with turnover structure on domestic market.

³ In the text are not quoted the activities that according to the Law on Statistics are confidential and in this way they are statistical secrecy.

2. Total Producer Price Indices in Industry¹

Total Producer Price Index in Industry in September 2013 did not change compared to the previous month. Lower prices were registered in the mining and quarrying industry by 2.5% and in the electricity, gas, steam and air conditioning supply by 0.2%, while in the manufacturing the prices went up by 0.2%.

In the manufacturing², more significant prices increases were seen in the manufacture of leather and related products by 1.8%, in the manufacture of paper and paper products by 1.0% and in the repair and installation of machinery and equipment by 0.4%, while the prices fell in the manufacture of food products by 1.7% and in the manufacture of chemicals and chemical products by 0.5%.

¹ Total Producer Price Index is calculated from Producer Price Index on Domestic Market and Producer Price Index on Non-domestic Market weighted with the turnover structure on domestic and on non-domestic market to the total value of turnover in the base year.

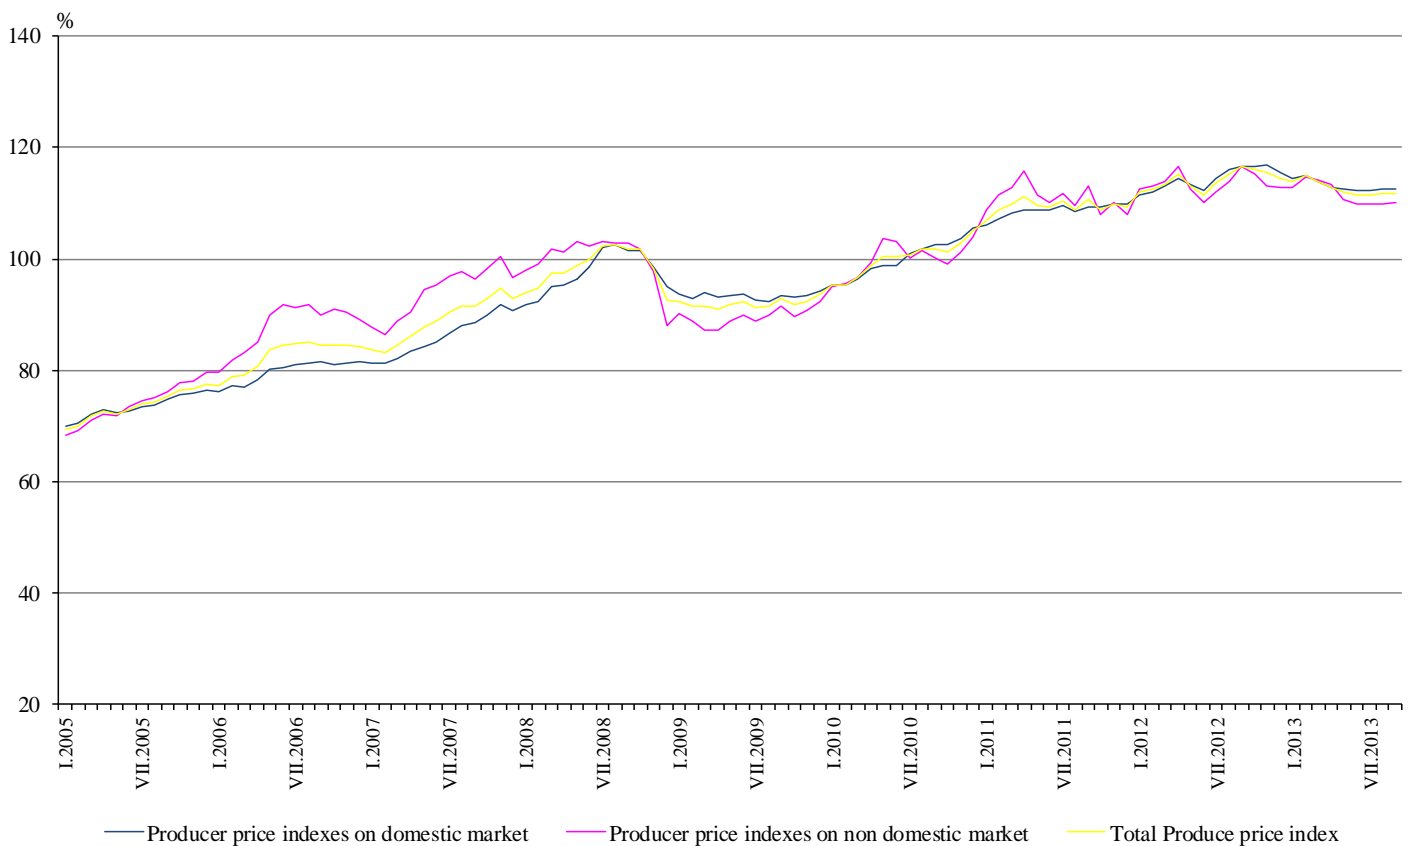

² In the text are not quoted the activities that according to the Law on Statistics are confidential and in this way they are statistical secrecy.
