In the manufacturing³, compared to the previous month the prices went up in the manufacture of basic metals by 1.7%, in the manufacture of chemicals and chemical products by 1.3%, in the manufacture of beverages and in the manufacture of fabricated metal products, except machinery and equipment by 0.2%, while a price decrease was reported in the manufacture of textiles by 0.8% and in the manufacture of other transport equipment by 0.4%.

Producer Price Index on Domestic Market in September 2014 decreased by 0.6% compared to the same month of 2013. The domestic prices fell in the mining and quarrying industry by 2.4% and in the electricity, gas, steam and air conditioning supply by 1.5%, while in the manufacturing the prices did not change.

In the manufacturing compared to September 2013, a price decrease was registered in the manufacture of food products by 2.3%, in the manufacture of other transport equipment by 1.9%, and in the manufacture of textiles by 1.6%. The prices increases were seen in the manufacture of tobacco products by 7.6%, in the manufacture of motor vehicles, trailers and semi-trailers by 5.3% and in the manufacture of beverages by 2.7%.

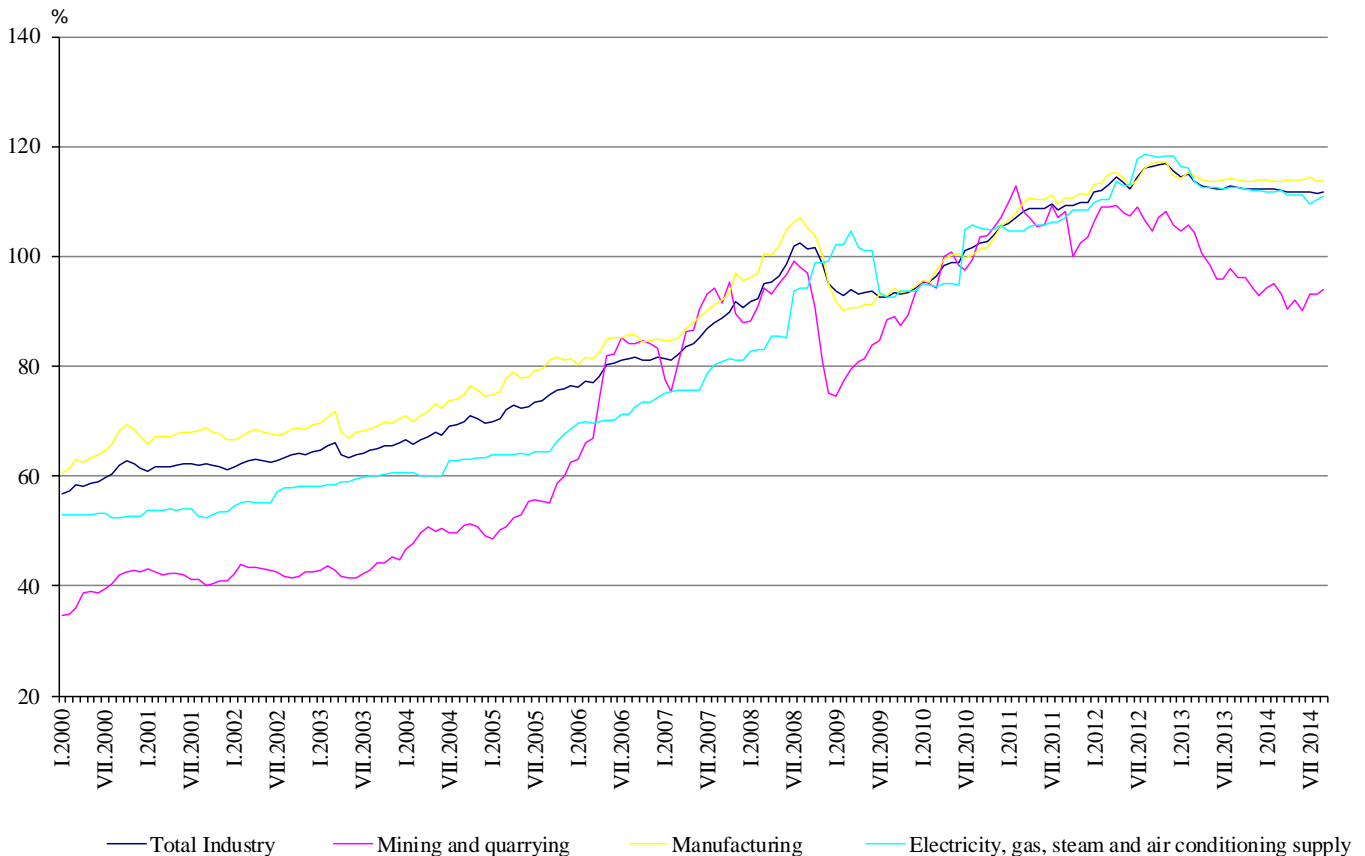

¹Producer Price Indices measure the average change in the prices of industrial products, which are produced and sold by Bulgarian enterprises. They can be considered as an early measure of the current inflation process in the economy and also they can be used for international comparisons. Information for calculation of Producer Price Indices is received on the bases of monthly surveys on producer prices of industrial products, sold on domestic market and on industrial products sold on non-domestic market. Producer price surveys are based on constant sample of groups of products, and that sample is representative for total industrial production.

² Producer Price Indices on domestic market are calculated at constant base (2010) weighed with turnover structure on domestic market.

2. Total Producer Price Indices in Industry¹

Total Producer Price Index in Industry in September 2014 increased by 0.3% compared to the previous month. Higher prices were registered in the manufacturing by 0.3% and in the electricity, gas, steam and air conditioning supply by 0.5%, while in the mining and quarrying industry the prices fell by 1.6%.

In the manufacturing², more significant prices increases were seen in the manufacture of basic metals by 2.0%, in the manufacture of leather and related products by 1.3% and in the manufacture of chemicals and chemical products by 1.1%, while prices decreases were reported in the manufacture of food products by 0.4% and in the manufacture of rubber and plastic products by 0.2%.

¹ Total Producer Price Index is calculated from Producer Price Index on Domestic Market and Producer Price Index on Non-domestic Market weighted with the turnover structure on domestic and on non-domestic market to the total value of turnover in the base year.
