CONSTRUCTION PRODUCTION INDICES IN AUGUST 2020^{1,2}

According to the preliminary data, in August 2020 the index of production in section 'Construction' calculated on the base of seasonally adjusted data³ was 1.0% below the level of the previous month (Table 1).

In August 2020 working day adjusted data⁴ showed a decrease by 4.9% in the construction production, compared to the same month of 2019 (Table 3).

³ Seasonal adjustment is a statistical method which eliminates the seasonal component of time series.

ULGARIAN TATISTICS

¹ Data for August 2020 are preliminary.

 $^{^2}$ The monthly indices show the short-term changes in the construction production between two comparable periods. This information can be used to analyse the current state of the construction activity in the country, as well as short-term forecast for its future development. The indices are calculated on the base of information on hours worked in the construction. The data are collected with monthly sample survey, which includes construction enterprises, which production exceeds 75% of the total production in construction. Construction Indices are calculated on the base 2015 = 100.

⁴ Working day adjustment is an adjustment for variations in monthly data, caused by calendar effects, different number of calendar and working days in the months, national holidays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

Monthly changes

In August 2020 the construction production index, calculated from the seasonally adjusted data, was below the level of the previous month. Index the production of building construction fell by 1.4% and production of civil engineering - by 0.5% (Table 1).

Annual changes

On an annual basis in August 2020, the decrease of production in construction, calculated from working day adjusted data, was determined from the negative rate in the building construction, where the drop was by 8.6%, while in the civil engineering was registered an increase by 0.3% (Table 3).
