INSTITUTE

CATALOGUE OF STATISTICAL PUBLICATIONS

2007

Dear users,

The National Statistical Institute has the pleasure of presenting the new *Catalogue of Statistical Publications 2007* to your attention.

The Catalogue contains detailed and clearly structured information on NSI printed and electronic publications issued in 2007, presented in 4 themes (General Publications, Population and Social Statistics, Economy, National Classifications). The Catalogue presents each publication by title, through a short summary of its contents, ISSN number, periodicity, type (printed or electronic), price and publication deadline.

In accordance with international practice, the National Statistical Institute offers an analogous electronic version of most publications, as well as publications available only on an electronic carrier (CD-ROM).

Along with its printed and electronic publications, the National Statistical Institute also disseminates the results from statistical surveys through its website (<http://www.nsi.bg>). In case you are not able to find the data you need in NSI publications or the website, please contact the Statistical Services Division. The practice of holding regular and special press conferences by the NSI head office and the Regional Statistical Offices also contributes towards a wider dissemination of statistical information. Users can also consult the library collection of the NSI Library.

We hope that the Catalogue will be useful as a basic guide to statistical information products offered by the NSI and will greatly facilitate users of statistical information.

We welcome comments and recommendations which could contribute towards improving the quality of products offered by the NSI and help us in their dissemination.

Publications Division

SUBSCRIPTION AND PURCHASE OF PUBLICATIONS

Subscription for NSI publications (printed and electronic) is available at the Publications Division (e-mail: publikacii@nsi.bg) and the Regional Statistical Offices. Users of statistical information can also subscribe to NSI publications by filling in the subscription order form attached at the end of this catalogue and sending it to the following address:

National Statistical Institute
Publications Division,
2, Panayot Volov St.
1038 Sofia,
Bulgaria

Purchase of NSI publications

Depending on the type of publication:

- **Printed** publications - available at the bookshop at 2, Panayot Volov St. as well as the NSI Publications Division and Regional Statistical Offices.
- **Electronic** publications - available at the NSI Publications Division and Regional Statistical Offices.

The price per publication indicated in the catalogue includes VAT and postal expenses.

Payment for publications

In cash:

Sofia

NSI head office
2, P. Volov St.

Districts

at the respective Regional
Statistical Offices

By bank transfer:

NSI Bank Account
Bulgarian National Bank
Knyaz Alexander Battenberg Square, Sofia
IBAN: BG84 BNBG 9661 3000 1190 01
BIC: BNBGBGSD

Purchase and subscription to NSI publications from abroad is only available by bank transfer. Cheques are not acceptable.

Publications which have already been paid for shall be sent to customers after a list of publications and a valid postal address is provided to the NSI Publications Division (**publikacii@nsi.bg**) or the respective Regional Statistical Office.

Invoices

Proforma invoices can be issued upon request.

Any subscription shall be considered valid after the receipt of a document verifying the payment. Invoices are issued on the date of the remittance of the sum to the NSI bank account.

The subscription deadline for NSI publications is March 31st 2007.

GENERAL PUBLICATIONS

STATISTICAL YEARBOOK OF THE REPUBLIC OF BULGARIA 2006

The Statistical Yearbook (74th edition) is the main publication of the National Statistical Institute. It provides domestic and international users with compound information about the demographic, social and economic development of Bulgaria for the 2000 - 2006 period.

Information sources are statistical surveys carried out by the NSI and other offices and institutions being bodies of statistics.

The statistical information presents the country as a whole (General Review) and is also given at a regional level (Regional Review) according to the administrative division of Bulgaria.

The Yearbook is designed thematically by chapters and each chapter is preceded by an introductory text with methodological notes.

A chapter containing time series by main indicators about the country's demographic, social and economic development for the 1990 - 2005 period is presented at the beginning of the General Review.

Along with information about Bulgaria, the Statistical Yearbook also contains an International Review Section with latest data for other countries available at the NSI at the date of preparation of the publication. This data enables users to work out international comparative analyses.

The publication is available as a printed edition and on CD - ROM.

STATISTICAL JOURNAL

Monthly edition worked out in accordance with Eurostat recommendations about improving information activity and creating synthetic bulletins with information on short-term statistical indicators. Recent synthesized information is submitted replacing the one in other statistical issues, such as Current Business Conjuncture, Statistical News, Prices, Consumer Price Indices and Inflation, Income, Expenditure and Consumption of Households, Export & Import (which ceased to be published at the end of 2001).

The edition presents an overall picture of country's development by months and quarters as well as annual data on main demographic, social and economic indicators. It also includes the latest information about country's current business conjuncture obtained on the basis of monthly business surveys of non-financial enterprises of public and private sectors. Annual and monthly data are given about consumer price indices, calculated on the basis of a monthly survey of the real retail prices of a consumer basket of goods and services provided to the population. Information from monthly sample household budgets' surveys as well as data about the foreign trade turnover of the Republic of Bulgaria, exports and imports shown both by countries and groups of countries and by SITC sections and groups, etc. is also included.

The information is presented in chapters separated by topics, and characterizes the economy both on a macro level, by GDP, investment, finance and by activity - industry, construction, transport, trade and tourism.

Information is also given about education, health, culture, crimes and justice. Data about the population by main demographic indicators, as well as those on important social indicators, such as total households' income, total households' expenditure, average monthly wages and salaries by economic activity, consumption of main foods and non-foods, etc., are also published.

The presented information is designed thematically by chapters, 7 of which are included in each issue, i.e. *Consumer Price Indices, Economic Conjuncture, Industry, Domestic Trade, Households Income, Expenditure and Consumption, Finance and Credits and Exports and Imports*. The chapters, containing data on the demographic processes in the country, education, health, culture, justice, labour market, investments and construction, transport and communications, international tourism and gross domestic product are included in the edition depending on the periodicity of information.

The issue contains an Information Index indicating methodological sources about the respective statistical surveys, and referring to the issues in which the respective chapters have been published, as well as providing information about contact addresses and NSI publications already issued and planned for 2008.

Information sources are the NSI statistical surveys and data obtained from other offices and institutions, such as Bulgarian National Bank, Ministry of Interior, etc.

The publication is available as a printed edition.

STATISTICS JOURNAL

Statistics Journal is a specialized scientific-theoretical and applied issue of the National Statistical Institute.

The journal contains information and comments about novelties in statistical theory and practice in the country and abroad. Special attention is given to the priority problems of the methodology and organization of actual statistical surveys and implementation of new information technologies.

It also presents the experience of international organizations and other countries in methodology and organization of statistical surveys, as well as consultations on different topics from statistical practice.

Since 2004 Statistics Journal has also published articles in English.

The publication is available as a printed edition.

BULGARIA 2006 - SOCIO-ECONOMIC DEVELOPMENT

The National Statistical Institute continues tradition to present analysis of demographic, social and economic development of the Republic of Bulgaria every year. This is a publication already running for thirteen years and the statistical analysis is oriented mainly towards 2006 and comparisons with the preceding years are made. The main development tendencies and the current structural changes are analyzed.

The main characteristics and specific problems of the current process and phenomena referring to the population and demographic processes, social characteristics and living conditions, main economic characteristics, business development, research & development activity and environment are examined in the edition. Special attention is paid to comparisons with EU countries.

The main results are presented at a national level, and where possible - at a regional level (planning regions and districts), by kind of ownership, by economic sectors and by activity.

This analytical publication is addressed to state and local authorities, business circles, non-governmental organizations, politicians, researchers, lecturers, students, experts and to all citizens who are interested in country's economic and social development.

The publication is available on CD-ROM.

THEME 2

POPULATION AND SOCIAL STATISTICS

POPULATION AND DEMOGRAPHIC PROCESSES 2006

The issue contains detailed statistical information about the demographic state in the Republic of Bulgaria during 2006. Data on the number and the structures of the population and marriages, births, deaths, divorces and internal migration registered during the year are published in the issue. All these events are given in separate sections and are linked with the main demographic characteristics of the persons whom they are registered to.

The demographic indicators for fertility, mortality, marriage and divorce rates are calculated and presented in the issue.

The publication contains time series of statistical data on the population and its natural movement for a period longer than fifty years. This gives the opportunity for in-depth and professional study of demographic processes in the country.

Data on the population and demographic events are presented at national and regional level. The regional review contains data by districts as well as planning regions and municipalities for some indicators.

A chapter that contains main indicators on natural movement in other European countries is also included.

The information in the issue is addressed to a wide range of users – governmental institutions, non-governmental organizations, demography experts and other customers, with an interest in trends in the development of the demographic processes in the country.

The publication is available as a printed edition and on CD-ROM.

POPULATION 2006

The issue contains data on the number of the population by sex and age, and its natural and migration movement.

The information about the natural and migration movement includes data on marriages, births, deaths, divorces and internal migration registered during the year.

Main indicators characterizing demographic processes' development are calculated and presented in the issue.

Data on the population and demographic events are presented at national and regional level according to the administrative division of the country - municipalities, districts and planning regions. Changes in administrative structure of the country during the year are reported and given in the appendix.

The included information is presented in a summarized form and is intended for a broad range of users.

The publication is available as a printed edition and on CD-ROM.

REGIONS, DISTRICTS AND MUNICIPALITIES IN THE REPUBLIC OF BULGARIA 2006

The publication contains data about the demographic, socio-economic and environmental state of Bulgaria's planning regions, districts and municipalities in 2006. It is a continuation of the annual NSI electronic publications containing regional data. The most important indicators have been chosen in order to reveal the specifics of the different territorial units. Tables are standardized to facilitate comparison between the territorial units. The main emphasis is put on the planning regions and districts and information about municipalities is limited. If data on municipal level are needed, the publications of the 28 Regional Statistical Offices can be used.

The published information is addressed primarily to researchers in the field of regional development and planning. It can also be used by a broader range of customers.

The publication is bilingual (Bulgarian/English) and can be useful to the participants in the EU accession process, as well as to foreign researchers.

The publication is available on CD-ROM.

HEALTH SERVICES 2007

The publication is a joint edition of the National Statistical Institute and National Centre for Health Information at the Ministry of Health.

The data sources are the annual statistical surveys carried out by the both institutions.

Data in the publication are systematized as follows:

- Population and demographic processes - main demographic indicators - number and structure of the population, births, crude death rate and infant mortality, mortality by causes of death etc.;

- Morbidity - incidence and prevalence of some socially significant diseases - cancers, tuberculosis and sex-transmitted diseases; hospitalization and persons discharged from hospitals by main groups of diseases; registered cases of infection diseases etc.;

- Health care system resources - health establishments and medical specialists and medical staff in health establishments; specialized institutions for social services; nurseries, homes for medical and social care for children etc.;

- Activities of hospitals - hospitalization by type of health establishments, entered and discharged persons by type of beds, average length of stay, utilization, turnover, surgical operations by type of health facility and type of operations, activities of the emergency medicine centres etc.

The edition contains time series with data on previous years. In a territorial aspect the information is presented by planning regions and districts. Some main demographic indicators are given by municipalities.

The edition is of interest for specialists in the field of public health care management and health insurance, companies with main activity import and distribution of medical equipment, medicines and materials, foundations in the social sphere, researchers in the field of health and social care and others.

The publication is available as a printed edition and on CD-ROM.

ENVIRONMENT 2006

The bulletin contains environmental data from statistical surveys in 2006. The information is systematized in the following sections:

- emissions in the air;
- water abstraction, water supply, average annual price of potable water, water use, waste waters, sewage treatment plants;
- waste - generated waste, industrial non-hazardous waste by kind of economic activity, municipal waste and collected solid and liquid waste;
- expenditure on protection and restoration of the environment - acquisition and maintenance of fixed assets with ecological use; sources of funding;
- availability and movement of tangible fixed assets with ecological use;
- noise pollution;
- protected natural scenery;
- crimes completed with proceedings finished against the environment and persons convicted.

The data are aggregated by branch, territorial and geographical aspects. Information is presented in tables, graphics and thematic maps. Each chapter contains methodological notes and an analysis.

The publication is of interest to the public, the Government, ecologists and economists.

The publication is available as a printed edition and on CD-ROM.

AVERAGE PRICES AND PURCHASED QUANTITIES OF BASIC FOOD AND NON-FOOD GOODS BY THE HOUSEHOLDS FOR THE 1992 - 2006 PERIOD

The electronic publication contains data on average prices and purchased quantities food and non-food goods by the households by years for the 1992 - 2006 period and by months of 2006. The information from the monthly survey of the household budgets is used and because of this these average prices differ from the average consumer prices published monthly by the NSI. Data on purchased foods are calculated on average per household and for non-food goods - per 100 households. There are also data on the purchasing power of the households calculated by means of the total and the monetary income, as well as the changes in this power.

The information in the publication is of interest to a wide number of users - government authorities, public organizations, students and others.

In 2007 NSI offers three publications on employment and unemployment.
Please read the respective annotations.

EMPLOYMENT AND UNEMPLOYMENT - BASIC DATA

The publication is a quarterly publication of National Statistical Institute, presenting **basic data** from the Labour force survey.

The Labour Force Survey is a sample statistical survey on households for examination of economic activity, employment and unemployment of the population aged 15 years and over. The methodology of the survey has been developed according to ILO and Eurostat recommendations.

The publication consists of 3 sections:

- Methodological notes - main concepts and definitions, used in the survey;
- Tables with comparable data on main indicators from the previous periods;
- Tables with data on the last quarter - number and characteristics (sex, age, place of residence, education) of employed and unemployed persons and persons out of the labour force, as a total on a national level and by planning regions.

The publication is available as a printed edition.

The electronic publication contains statistical data on crimes with penalty inflicted. It includes data about the regional, district and martial courts' activity on penal cases of general, private and administrative nature. Comparable data on crimes with penalty inflicted as well on persons convicted with sentences which have come into force for the 1989 - 2006 period are also shown.

The issue contains basic methodological notes and an analysis on crimes with penalty inflicted as well on persons convicted with sentences which have come into force.

The information is systematized in two parts: General Review and Regional Review in accordance with the administrative division of the Republic of Bulgaria.

The first one contains information about persons convicted with sentence which has come into force by type of crime, by main socio-demographic indicators (sex, age, education, labour activity), kind of penalty inflicted, previous penalties, recidivism, etc.

Data about crimes with penalty inflicted on juveniles aged 14-17 years by sex, age, education, labour and education activity, kind of penalty, previous penalties, recidivism, etc. are included in separate tables.

The Review by districts contains data about crimes with penalty inflicted and persons convicted (including minors convicted) by place of crime.

The publication is available on CD-ROM.

ROAD TRAFFIC ACCIDENTS IN THE REPUBLIC OF BULGARIA 2006

The publication is a joint edition of the National Statistical Institute and the Ministry of Interior.

It contains tables with annual information for 2006 about road traffic accidents, killed and injured persons registered in the country distributed by:

- districts and municipalities;
- nature of accidents;
- location and class of road;
- age and sex of persons involved in accidents;
- type and property of the vehicles.
- main reasons;
- days of the week and months;
- foreign drivers' fault, distributed by countries.

The data give the possibility for a multiaspect analysis of the road traffic accidents and the changes which have occurred in a comparison to the previous year as well as the state of the road traffic safety in the country.

THEME 3

ECONOMY

MAIN MACROECONOMIC INDICATORS 2006

The National Statistical Institute of Bulgaria presents the eleventh issue of the annual publication **Main Macroeconomic Indicators**. It contains the results from the official statistics' work on calculation of main macroeconomic indicators for Bulgaria in accordance with the System of National Accounts (SNA '93) and the European System of Accounts (ESA '95).

The publication presents time series data for Bulgaria's gross domestic product (GDP) for the 1980 - 2006 period; main indicators characterizing the economy's development since 1989; main per capita aggregates for the 1991 - 2006 period.

The GDP data for the 2000 - 2006 period are presented by the following three approaches - production approach, income approach and final expenditure approach. For the main GDP aggregates by the production and by the final expenditure approaches, preceding year based volume indices, preceding year based deflators, ratios and relative shares are also published. The Production and Generation of income accounts are presented by activities, by economic and institutional sectors. The publication presents integrated economic accounts and non-financial national accounts by institutional sectors for 2005.

The publication also includes information about regional GDP and regional gross value added for the 1999 - 2006 period. It also includes national financial accounts for 2004 characterizing financial operations carried out between institutional units (sectors).

Published data for 2006 are preliminary.

The publication is available as a printed edition and on CD-ROM.

SUPPLY USE TABLES 2002

Bulgarian Input-Output Tables are integrated in the framework of annual National Accounts and are key indicator for their quality.

The publication contains the results from the work on calculation of the Supply and Use tables and cross Input - Output tables, describing economic and technological relationships in the production process.

The general frame of the Supply and Use tables is in accordance with the revised methodology of the 1993 International System of National Accounts (SNA '93) and the methodological standards of the European System of Accounts (ESA '95).

The flows of products and services in the economic system are described in two versions - balanced Supply and Use tables and cross Input - Output tables. Both types of tables are structured by industries and products on the basis of national classifications corresponding to European classification standards.

The supply table shows at a detailed level the resource of goods and services, produced by resident units in the economic territory, which are grouped into industries and sub-industries, according to their main activity. The supply table has a rectangular structure. At aggregated level it consists of 60 commodity groups and 60 industries.

The Use table shows the consumption of goods and services from all economic units classified according to their main activity by industries, or treated as final consumption categories, as well as the elements of value added by industries. The number of industries - users and commodity groups is the same as in the Supply table. The final consumption categories are as follows: individual consumption of households; expenditures of general government for individual and collective consumption; fixed capital formation; changes in inventories and exports.

Input - Output tables are square matrix tables of industry/industries.

Data in the tables are valued at basic prices. The elaboration of the component sub-matrices (trade and transport margins; taxes on products) in the Use table, allows evaluation of the flows from basic prices to purchaser's prices.

The publication is available on CD-ROM.

FOREIGN TRADE OF THE REPUBLIC OF BULGARIA 2007

The issue contains data on exports and imports of goods from/to Bulgaria for 2006. Information on the main Bulgarian trade partners, number of companies dealing with foreign trade activity, as well as number of countries, which Bulgaria trades with can be found in the edition. Data are presented by chapters and headings of HS, and by sections and divisions of SITC. Information about commodities groups taking part in the Bulgarian turnover and about the value of the transactions for more than 100 countries is also given. The issue contains information about the change of exports and imports price indices, as well as the index for terms of trade during the relevant year. The general annual data are presented in the dynamics for a number of consecutive years.

The publication is available as a printed edition and on CD-ROM.

TOURISM 2006

The publication contains statistical data on the development of tourism and recreation in Bulgaria. Basic statistical data for the years 1980, 1985, 1990 and the 1995 - 2006 period are included, as well as methodological notes.

The data are classified into five sections.

- International tourism

The source of information about international tourism is the Ministry of Interior where the data from the border checkpoints on the arrivals of visitors from abroad to Bulgaria and travels of Bulgarian residents abroad are processed. This section includes data about number of foreigners' visits to Bulgaria by country of origin, by months, purpose of visit and by mode of transport as well as travel of Bulgarian residents abroad by country of destination, by months and by purpose of visit.

- Tourism and recreation accommodation

The sources of data are statistical surveys on accommodation and rest houses. This section includes data about accommodation establishments by type (hotels, mountain chalets, camping sites and other accommodation establishments for short-time accommodation), nights spent by Bulgarians and foreigners by categories of the establishments and by months, arrivals of Bulgarians and foreigners in accommodation establishments by categories of the establishments and by months, arrivals of foreigners by country of origin; rest houses by type of resort (seaside, mountain and balneological), persons rested by type of resort, and by duration of rest.

- Tourism accommodations by districts

The section contains data about activity of accommodation establishments by districts during 2006.

- Tourism by resorts

Resorts with national importance defined by decision No. 45 of the Council of Ministers of 25th January 2005 (Official Gazette, No. 11/01.02.2005) are included in the section by resorts. The sources of data are statistical surveys on accommodation and rest houses. Data on resorts by type, nights spent by Bulgarians and foreigners, as well as arrivals of Bulgarians and foreigners in accommodation establishments in the respective resorts are also included.

- Rest houses by districts

Contains data about activity of rest houses during 2006 by districts.

Methodological notes are included in the publication.
The publication is available as a printed edition and on CD-ROM.

THEME 4

NATIONAL CLASSIFICATIONS

NATIONAL CLASSIFICATION OF ECONOMIC ACTIVITIES (NACE.BG – 2008)

The National Classification of Economic Activities (NACE.BG - 2008) is a new Bulgarian version of the common EU classification standard - Statistical Classification of Economic Activities (NACE Rev. 2), which is part of the integrated system of statistical classifications at European level. The classification changes are motivated by the need of adapting the classification to the changes of the economy during the last 15 years, mainly due to the developments in information and communication technology, health care and other service sections.

The classification is introduced into national statistical practice in 2001 and according to the Law on Statistics shall be mandatory for the establishment and maintenance of the national statistical and information systems and registers. The new national version shall enter into force on 1 January 2008, on the same date as NACE Rev. 2 in the EU.

The main purpose of the classification standard is the compilation and presentation of comparable statistics by economic activities, as well an instrument in field of economic analyses in case grouping by kind of activity is necessary.

The publication contains an introduction (methodological notes), rules for application of the classification, the classification, classification structure, explanatory notes to the positions and correspondence table between codes of the new version and the predecessor.

The publication is available as a printed edition and on CD-ROM.

NATIONAL CLASSIFICATION OF FIELDS OF EDUCATION AND TRAINING

The National Classification of Fields of Education and Training is a Bulgarian version of the common EU standard „Fields of Education and Training 1999“ (Commission of the European Communities, DG Eurostat), currently used at European level for strategic planning and statistics, and in national documents and activities mainly as an instrument suitable for compilation and presentation of comparable statistical data in the field of education and training. The classification is based entirely on the International Standard Classification of Education, version 1997 (ISCED '97), since its two-digit level corresponds to ISCED fields of education

The main purpose of the statistical standard is the classification into fields of the educational programmes/ subjects that can be studied either in formal educational system (school and university education and training) or in continuing vocational training.

The publication contains an introduction (methodological notes), rules for application of the classification, classification, classification structure and explanatory notes to the positions.

The publication is available as a printed edition and on CD-ROM.
